4. **Pledge of Allegiance**

Proclamations and Recognition

5. [2020 Kay Citizenship Week Proclamation](#)

6. Service Awards

7. Personal Appearances. Personal appearances are opportunities for organizations or citizens to make special presentations before the City Commission. Such appearances are scheduled in advance of the meeting by calling City Clerk Tabitha Sharp at (316) 321-9100 by 5:00 pm the Tuesday preceding the meeting. Presentations are limited to ten minutes. Any presentation is for information purposes only; no action will be taken.

8. Public Comments. Persons who wish to address the City Commission regarding items not on the agenda and that are under the jurisdiction of the City Commission may do so when called upon the Mayor. Comments on personnel matters and matters pending in court are not permitted. Speakers are limited to three minutes. Any presentation is for information purposes only; no action will be taken. Citizens with information for the City Commission are encouraged to contact City Clerk Tabitha Sharp at (316) 321-9100 for instructions on alternative ways of communicating with the City Commission.

Consent Agenda (*Consent agenda items will be acted on by one motion unless a majority of the City Commission votes to remove an item for discussion and separate action.*)

19. Motion to adjourn the December 7, 2020 regular meeting

PUBLIC COMMENT POLICY:

Citizens are encouraged to address the City Commission during regularly scheduled meetings. This policy is intended to provide some guidelines to ensure that all El Dorado citizens have a chance to address the Commission.

1. Each citizen will state their name and address before making comments.
2. There are no residency requirements.
3. Each citizen will have 3 minutes to present his or her comments.
4. An extension of time, if necessary, may be approved but must be by a majority of the City Commission.
5. Comments or questions will be directed only to the City Commission.
6. Citizens will follow the decorum policy.
7. Debate or argument between parties in the audience will not be allowed.
8. Certain legal issues may not be discussed. (Examples include but are not limited to personnel issues, lawsuits, etc.)
9. Violation of this public comment policy will result in the citizen being directed to cease or resume sitting.

Approved by the Commission this 2nd day of May 2005.

PROCLAMATION

WHEREAS, the El Dorado Middle School KAY Club members are joining other Kays and Kayettes across the state in observing KAY Citizenship Week, December 6-12, 2020; and,

WHEREAS, the Kansas Association for Youth (KAY) is a character-building, leadership training program directed by the Kansas State High School Association; and

WHEREAS, the local organization is under the direction of the high school principal who, in turn, appoints a sponsor(s) to lead and guide the club program; and

WHEREAS, KAY is a nationally acclaimed organization which provides students an opportunity to learn to assume their citizenship responsibilities and to enrich their personalities through well-organized programs, projects and parties; and

WHEREAS, the programs educate, inspire, and direct members into carefully planned service projects; and

WHEREAS, these programs emphasize four areas of service, school, community, nation and world;

WHEREAS, KAY Citizenship Week is a week-long celebration of this Association. It is a time to spotlight youth in action. Each day is designated a specific service, Monday – School; Tuesday – Community; Wednesday – Nation; Thursday – World; Friday – Club; Saturday – Home, and Sunday – Family.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the City of El Dorado, Kansas, to be affixed this 7th day of December, 2020.

Mayor Bill Young

Seal

Tabitha Sharp, City Clerk

TO: City Commission
FROM: Kristina Traina, Administrative Assistant
SUBJ: Meeting Cancellation
DATE: December 4, 2020

Background:

Historically the City Commission of El Dorado has cancelled the second meeting in December if all items can be dealt with during the first meeting.

Policy Issue:

The regular meetings are set by ordinance and so the Commission must vote to cancel them.

Alternatives:

Hold the regular meeting.

Fiscal Impact:

N/A

Staff Recommendation:

Cancel the 2nd December meeting.

Commission Actions:

Commissioner _____ moved that the second City Commission meeting in December, Monday, December 21, 2020 be canceled.

Commissioner _____ seconded the motion.

[Return to Agenda](#)

TO: City Commission
FROM: Tammy Schaffer, Finance Director
SUBJ: 2020 Budget Amendment
DATE: December 4, 2020

Background:

Each year, the City Commission must amend the budget if we go over the published expenditures in any fund. The Economic Development Fund went over by \$219,977 due to the receipt of Cares Act funds and \$70,000 for the sale of real estate in the Griler Addition. The City was required to expend the Cares Act Funding by December 31, 2020. The CNG Fund went over the published expenditures due to the unexpected purchase of a compressor for \$54,000.

Policy Issue:

The State of Kansas requires the City Commission to hold a public hearing before approving a budget amendment.

Alternatives:

N/A

Fiscal Impact:

This will increase the allowable expenditures in the Economic Development fund by \$219,977 and the CNG fund by \$54,000. Both funds had revenue available to cover the increased expenses.

Trade-offs:

N/A

Staff Recommendation:

Hold the public hearing and approve the amendment.

Public Hearing

Mayor Bill Young will open a public hearing.

Commission Actions:

Commissioner _____ moved to approve the amendment to the 2020 Operating Budget in the Economic Development and CNG funds as presented.

Commissioner _____ seconded the motion.

FROM: David Dillner, City Manager
SUBJ: Proposed Mask/Face Covering Ordinance
DATE: December 4, 2020

Background: As of December 3, 2020, the State of Kansas has reported 162,061 positive cases of COVID-19 spread among 105 counties, including 1,679 deaths. Recent weeks have seen the numbers of COVID-19 cases, hospitalizations, and deaths spike in Kansas and across the nation. The City of El Dorado has seen positive COVID cases increase in recent weeks. School Districts struggle to keep staff and students healthy, and City offices have experienced cases that have put the municipal organization in a state of heightened caution.

On November 24, 2020, the Board of County Commissioners voted 4-1 to exercise its authority under K.S.A. 48-925(h) to "opt out" of participating in Governor Kelly's Executive Order 20-68, requiring the wearing of facemasks or coverings to minimize the potential for the spreading of COVID-19. The County Commission instead adopted a resolution strongly encouraging the community to wear masks or face coverings to that end. Executive Order 20-68 was to go into effect at 12:01 am on November 25, 2020, although it will not be effective in El Dorado without action by the City Commission to adopt a local ordinance requiring masks or face coverings.

Staff prepared the proposed ordinance based on input received from the City Commission at the December 2, 2020 work session. Major changes to the draft ordinance include: a) changing the penalty type from a misdemeanor to an infraction; b) removing the section exempting activities and events held or managed by the Kansas Legislature; c) violators will be assessed applicable court costs and fees; and d) the ordinance will be effective for forty-five days after its effective date unless otherwise extended by an ordinance approved by the City Commission (sunset date of February 1, 2021 based on approval at December 7 regular meeting and publication on December 17).

Policy Commentary: Adoption of a municipal mask ordinance will create a novel offense requiring attention and enforcement by the El Dorado Police Department. The department will respond to possible violations of the ordinance only as law enforcement resources allow. Higher priority calls for service, as determined by the Police Department, will receive attention before responding to any alleged mask ordinance violations. In addition, the El Dorado Police Department's initial enforcement duties will involve education rather than strict enforcement.

Fiscal Impact: The City does not anticipate any meaningful impact to the City's budget as a result of adoption of any local ordinance requiring encourage mask or face coverings. The City will conduct an education

campaign to inform the public of the adoption of a mask ordinance and communicate the rationale for wearing a mask, although this effort is expected to require negligible public resources. Enforcement of the ordinance will use existing resources; a dedicated police officer will not be made available to respond to anticipated high volumes of call activity related to the mask ordinance.

Staff notes that if court costs and fees are included with the fine for violating the ordinance, the total cost to violators increases as follows. The City retains \$66.50 of the \$90 in court costs assessed by Ordinance No. G-1250. The remaining \$23.50 are sent to the State of Kansas.

- a. First offense from \$25 to \$115
- b. Second offense from \$50 to \$140
- c. Third and subsequent offenses from \$100 to \$190

Legal Review: The City Attorney believes the ordinance, as written, is enforceable under the City's home rule authority.

Trade-offs: There is no clear evidence that a mask mandate will reduce the number of positive cases in El Dorado. Non-compliance will still occur because the City lacks the resources to meticulously enforce an ordinance. People who wear masks or face coverings are still susceptible to infection from the coronavirus. Even so, wearing masks or face coverings reduces the probability of infection and minimizes the potential for continued spread of COVID-19 throughout the community.

Commission Action:

Commissioner _____ moved to approve Ordinance No. _____, an Ordinance requiring the wearing of masks or other face coverings in public space in El Dorado, Kansas.

Commissioner _____ seconded the motion.

ORDINANCE NO. ____

**AN ORDINANCE REQUIRING THE WEARING OF MASKS OR OTHER FACE COVERINGS
IN PUBLIC SPACES IN EL DORADO, KANSAS**

WHEREAS, securing the health, safety, and economic well-being of residents of the City of El Dorado is the priority of the City Commission; and

WHEREAS, the United States Departments of Health and Human Services declared a public health emergency for COVID-19 beginning January 27, 2020, with now more than 12.4 million cases of the illness and more than 250,000 deaths as a result of the illness across the United States; and

WHEREAS, the World Health Organization declared a pandemic on March 11, 2020; and

WHEREAS, a State of Disaster Emergency was proclaimed for the State of Kansas on March 12, 2020; and

WHEREAS, on March 13, 2020, the President of the United States declared the ongoing COVID-19 pandemic of sufficient severity and magnitude to warrant an emergency declaration for all states, tribes, territories, and the District of Columbia pursuant to Section 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. § 5121-5207 (the "Stafford Act"); and

WHEREAS, on March 13, 2020, the President of the United States pursuant to Sections 201 and 301 of the National Emergencies Act, 50 U.S.C. § 1601, et seq. and consistent with Section 1135 of the Social Security Act, as amended (42 U.S.C. § 1320b-5), declared a national emergency that the COVID-19 outbreak in the United States constitutes a national emergency beginning March 1, 2020; and

WHEREAS, as of ~~November 23~~[December 3](#), 2020, in Kansas there have been ~~142,059~~[162,061](#) reported positive cases of COVID-19 spread among 105 counties, including ~~1,456~~[1,679](#) deaths; and

WHEREAS, after a steady trend of decreasing metrics, recent weeks have seen the numbers of COVID-19 cases, hospitalizations, and deaths spike in Kansas and across the nation; and

WHEREAS, in Butler County, there is a recent increase in cases as is reported; and

WHEREAS, this of increased COVID-19 spread is a danger to the health and safety of residents of El Dorado and also presents a serious threat to keeping the El Dorado economy open and thriving; and

WHEREAS, wearing a mask in public is the easiest and most effective way to protect each other and help keep our businesses open and our economy running; and

WHEREAS, the City of El Dorado must remain flexible to account for the evolving nature and scope of the unprecedented public health emergency posed by COVID-19, while also simultaneously safely, strategically, and incrementally reopening business and facilitating economic recovery and revitalization; and

WHEREAS, the Butler County Board of Commissioners on November 24, 2020, elected to exercise its authority under K.S.A. 48-925(h) to "opt out" of Governor Kelly's Executive Order 20-68; and

WHEREAS, the City Commission of the City of El Dorado deems it necessary and appropriate to adopt a local ordinance [requiring the covering of the nose and mouth making effective Executive Order 20-68](#) within the corporate limits of the City of El Dorado; and

WHEREAS, for the aforementioned and other reasons, and in recognition and furtherance of our responsibility to provide for and ensure the health, safety, security, and welfare of the people of the City of El Dorado, requiring that masks or other face coverings be worn in public spaces is necessary to promote and secure the safety and protection of the civilian population,

NOW, THEREFORE, BE IT ORDAINED, by the Governing Body of El Dorado, Kansas:

SECTION 1. Definitions. The following terms shall have the following meanings:

- a. "Mask or other face covering" means a covering of the nose and mouth that is secured to the head with ties, straps, or loops over the ears or is simply wrapped around the lower face. A mask or other face covering can be made of a variety of synthetic and natural fabrics, including cotton, silk, or linen. Ideally, a mask or other face covering has two or more layers. A mask or other face covering may be factory-made, sewn by hand, or can be improvised from household items such as scarfs, bandanas, t-shirts, sweatshirts, or towels.
- b. "Public space" means any indoor or outdoor space or area that is open to the public; this does not include private residential property or private offices or workspaces that are not open to customers or public visitors.

SECTION 2. Requirements of persons. Effective 12:01 am on December 14¹⁸, 2020, all persons in the City of El Dorado shall cover their mouths and noses with a mask or other face covering when they are in the following situations where distancing of six feet at all times is not possible:

- a. Inside any indoor public space where distancing of six feet at all times is not possible;
- b. While standing in line and waiting to enter an indoor public space;
- c. Obtaining services from the healthcare sector in settings, including but not limited to, a hospital, pharmacy, medical clinic, laboratory, physician or dental office, veterinary clinic, or blood bank, unless directed otherwise by an employee or healthcare provider;
- d. Waiting for or riding on public transportation or while in a taxi, private car service, or ridesharing vehicle; or
- e. While outdoors in public spaces and unable to maintain a six-foot distance between individuals (not including individuals who reside together) with only infrequent or incidental moments of closer proximity.

SECTION 3. Requirements of businesses, organizations, and non-profit associations. Effective 12:01 am on December 14¹⁸, 2020, all businesses, organizations, and non-profit associations operating within the corporate limits of the City of El Dorado must require all employees, customers, visitors, members, and the public to wear a mask or other face covering where distancing of six feet at all times is not possible when:

- a. Employees are working in any space visited by customers, members of the public or co-workers, who are present at the time;
- b. Employees are working in any space where food is prepared or packaged for sale or distribution to others;

- c. Customers, members, visitors, or members of the public are in a facility managed by the business or organization; or
- d. Employees are in any room or enclosed area where other people (except for individuals who reside together) are present and are unable to maintain a six-foot distance except for infrequent or incidental moments of closer proximity.

SECTION 4. Exemptions. The following individuals are exempt from wearing masks or other face coverings in the situations described in Sections 2 and 3:

- a. Persons age five years or under; children age two years and under in particular should not wear a face covering because of the risk of suffocation;
- b. Persons with a medical condition, mental health condition, or disability that prevents wearing a face covering—this includes persons with a medical condition for whom wearing a face covering could obstruct breathing or who are unconscious, incapacitated, or otherwise unable to remove a face covering without assistance;
- c. Persons who are deaf or hard of hearing, or communicating with a person who is deaf or hard of hearing, where the ability to see the mouth is essential for communication;
- d. Persons for whom wearing a face covering would create a risk to the person related to their work, as determined by local, state, or federal regulators or workplace safety guidelines;
- e. Persons who are obtaining a service involving the nose or face for which temporary removal of the face covering is necessary to perform the service;
- f. Persons who are seated at a restaurant or other establishment that offers food or beverage service, while they are eating or drinking, provided they maintain a six-foot distance between individuals (not including individuals who reside together or are seated together) with only infrequent or incidental moments of closer proximity;
- g. Athletes who are engaged in an organized sports activity that allows athletes to maintain a six-foot distance from others with only infrequent or incidental moments of closer proximity;
- h. Persons who are engaged in an activity that a professional or recreational association, regulatory entity, medical association, or other public-health-oriented entity has determined cannot be safely conducted while wearing a mask or other face covering;
- i. ~~Persons engaged in an activity or event held or managed by the Kansas Legislature;~~
- j. Persons engaged in a court-related proceeding held or managed by the Kansas Judiciary; and
- k. Persons engaged in any lawful activity during which wearing a mask or other face covering is prohibited by law.

SECTION 5. Enforcement, violations and penalties.

- a. Any person, business, organization, or non-profit association violating the provisions of this ordinance shall be guilty of ~~misdemeanor~~an infraction, punishable by:
 1. A fine of no less than twenty-five dollars (\$25.00) upon a first ~~violation~~conviction.
 2. A fine of no less than fifty dollars (\$50.00) upon a second ~~violation~~conviction.
 3. A fine of no less than one hundred dollars (\$100.00) upon a third or subsequent ~~violation~~conviction.
 4. Each occurrence of a ~~conviction~~violation of this ordinance shall be considered a separate and distinct violation.
- b. Infractions cited by the enforcement of this ordinance shall be assessed applicable court costs and fees as defined by Ordinance No. G-1250.

SECTION 6. Effective. This ordinance shall be in full force and effect for forty-five days from and after its adoption and publication once in the official city newspaper by the following summary and after its effective date of December 18, 2020, and until otherwise rescinded unless otherwise extended by an ordinance duly adopted by the City Commission.

Ordinance No. _____ Summary

On December 7, 2020, the City Commission passed Ordinance No. _____. The Ordinance requires the wearing of masks or other face coverings in public spaces; addresses the requirements of persons, businesses, organizations, and non-profit associations; outlines specific exemptions from the requirement of wearing masks or other face coverings; and addresses the penalties for a first, second, and any subsequent violations of the Ordinance. A complete copy of the Ordinance may be found at www.eldoks.com or in the office of the City Clerk, 220 W. First Avenue, El Dorado, KS 67042, free of charge. This summary is certified by the City's legal counsel.

PASSED and APPROVED by the Governing Body of the City of El Dorado, Kansas on December 7, 2020.

NOW, THEREFORE, BE IT ORDAINED, by the Governing Body of El Dorado, Kansas:

SECTION 1. Definitions. The following terms shall have the following meanings:

- a. "Mask or other face covering" means a covering of the nose and mouth that is secured to the head with ties, straps, or loops over the ears or is simply wrapped around the lower face. A mask or other face covering can be made of a variety of synthetic and natural fabrics, including cotton, silk, or linen. Ideally, a mask or other face covering has two or more layers. A mask or other face covering may be factory-made, sewn by hand, or can be improvised from household items such as scarfs, bandanas, t-shirts, sweatshirts, or towels.
- b. "Public space" means any indoor or outdoor space or area that is open to the public; this does not include private residential property or private offices or workspaces that are not open to customers or public visitors.

SECTION 2. Requirements of persons. Effective 12:01 am on December 18, 2020, all persons in the City of El Dorado shall cover their mouths and noses with a mask or other face covering when they are in the following situations where distancing of six feet at all times is not possible:

- a. Inside any indoor public space;
- b. While standing in line and waiting to enter an indoor public space;
- c. Obtaining services from the healthcare sector in settings, including but not limited to, a hospital, pharmacy, medical clinic, laboratory, physician or dental office, veterinary clinic, or blood bank, unless directed otherwise by an employee or healthcare provider;
- d. Waiting for or riding on public transportation or while in a taxi, private car service, or ridesharing vehicle; or
- e. While outdoors in public spaces and unable to maintain a six-foot distance between individuals (not including individuals who reside together) with only infrequent or incidental moments of closer proximity.

SECTION 3. Requirements of businesses, organizations, and non-profit associations. Effective 12:01 am on December 18, 2020, all businesses, organizations, and non-profit associations operating within the corporate limits of the City of El Dorado must require all employees, customers, visitors, members, and the public to wear a mask or other face covering where distancing of six feet at all times is not possible when:

- a. Employees are working in any space visited by customers, members of the public or co-workers, who are present at the time;
- b. Employees are working in any space where food is prepared or packaged for sale or distribution to others;

- c. Customers, members, visitors, or members of the public are in a facility managed by the business or organization; or
- d. Employees are in any room or enclosed area where other people (except for individuals who reside together) are present and are unable to maintain a six-foot distance except for infrequent or incidental moments of closer proximity.

SECTION 4. Exemptions. The following individuals are exempt from wearing masks or other face coverings in the situations described in Sections 2 and 3:

- a. Persons age five years or under; children age two years and under in particular should not wear a face covering because of the risk of suffocation;
- b. Persons with a medical condition, mental health condition, or disability that prevents wearing a face covering—this includes persons with a medical condition for whom wearing a face covering could obstruct breathing or who are unconscious, incapacitated, or otherwise unable to remove a face covering without assistance;
- c. Persons who are deaf or hard of hearing, or communicating with a person who is deaf or hard of hearing, where the ability to see the mouth is essential for communication;
- d. Persons for whom wearing a face covering would create a risk to the person related to their work, as determined by local, state, or federal regulators or workplace safety guidelines;
- e. Persons who are obtaining a service involving the nose or face for which temporary removal of the face covering is necessary to perform the service;
- f. Persons who are seated at a restaurant or other establishment that offers food or beverage service, while they are eating or drinking, provided they maintain a six-foot distance between individuals (not including individuals who reside together or are seated together) with only infrequent or incidental moments of closer proximity;
- g. Athletes who are engaged in an organized sports activity that allows athletes to maintain a six-foot distance from others with only infrequent or incidental moments of closer proximity;
- h. Persons who are engaged in an activity that a professional or recreational association, regulatory entity, medical association, or other public-health-oriented entity has determined cannot be safely conducted while wearing a mask or other face covering;
- i. Persons engaged in a court-related proceeding held or managed by the Kansas Judiciary; and
- j. Persons engaged in any lawful activity during which wearing a mask or other face covering is prohibited by law.

SECTION 5. Enforcement, violations and penalties.

- a. Any person, business, organization, or non-profit association violating the provisions of this ordinance shall be guilty of an infraction, punishable by:
 1. A fine of no less than twenty-five dollars (\$25.00) upon a first conviction.
 2. A fine of no less than fifty dollars (\$50.00) upon a second conviction.
 3. A fine of no less than one hundred dollars (\$100.00) upon a third or subsequent conviction.
 4. Each occurrence of a conviction of this ordinance shall be considered a separate and distinct violation.
- b. Infractions cited by the enforcement of this ordinance shall be assessed applicable court costs and fees as defined by Ordinance No. G-1250.

SECTION 6. Effective. This ordinance shall be in full force and effect for forty-five days from and after its adoption and publication once in the official city newspaper by the following summary and after its effective date of December 18, 2020 unless otherwise extended by an ordinance duly adopted by the City Commission.

Ordinance No. _____ Summary

On December 7, 2020, the City Commission passed Ordinance No. _____. The Ordinance requires the wearing of masks or other face coverings in public spaces; addresses the requirements of persons, businesses, organizations, and non-profit associations; outlines specific exemptions from the requirement of wearing masks or other face coverings; and addresses the penalties for a first, second, and any subsequent violations of the Ordinance. The publication summary set forth above is certified this ____ day of December, 2020.

Ashlyn Lindskog, City Attorney

Good Morning Commissioners/Board of Health,

Per HB 2016 consultation with a public health officer must be completed prior to opting out of an order from the Governor. I have reached out to our medical professionals for guidance. I have included all of their feedback. I have also included correspondence from our citizens concerning masking.

Here is a link to the New York Times that has an interactive demonstration of how masks work:

<https://www.nytimes.com/interactive/2020/10/30/science/wear-mask-covid-particles-ul.html?auth=link-dismiss-google1tap>

Our hospitals are in critical condition either due to bed capacity or staffing capacity, or both. Our physicians are seeing an increase in patients. The Health Department is past capacity. Our numbers are increasing at an alarming rate. In less than two weeks Butler County's death count went from 3 to 8.

Last week the Commission passed a policy for schools concerning masking in the classroom. This was done in order to keep more children in the classroom and because there was proof that masks work to reduce transmission. It has also been viewed as a means to increase mask usage. Schools are doing everything they can to keep children in school. They need the assistance of the public as the majority of the cases are occurring outside of school. The Governor's mask order is the next logical step. Both policies go hand-in-hand.

The time has come to take further action. As your Public Health Officer, I recommend letting the Governor's order take effect and delay action until after January 1, 2021. This provides over a month to see if there is any change in case numbers. I also recommend passing a mass gathering limit as it is proven that masks and social distancing are two key steps in slowing the spread of COVID-19.

If you choose to opt out of the governor's mask order, that action muddies (and even contradicts) the message that is being sent by supporting and encouraging the schools that have mask policies. To avoid sending conflicting messages to our citizens, either both policies should stand or neither one should."

Thank you,

Jamie Downs

Subject: Re: Statement to County Commissioners on masking

Covid19 activity is surging in South-Central Kansas. Reno, Sedgwick, and Butler counties are all seeing a record number of cases and test positivity rates. The Wichita area and surrounding hospitals are at critical capacity. All have been intermittently on diversion since October.

In the hospitals we are caring for your friends, co-workers, and loved ones who are ill with this pandemic virus. Some of them are not doing well, despite the best available medical care and heroic efforts by the nurses and other professional medical staff.

By now, all of us know the right thing to do to protect our friends, loved ones, and neighbors. Reducing the risk of spreading this dangerous virus is as easy as wearing masks, continuing to physically distance, and frequent hand cleansing. There are very few other viruses or illness being transmitted in our community right now. If you are ill, it is likely due to Covid19, so stay home and isolate. Show respect to our community by doing your part to decrease transmission.

There is really no legitimate argument against the importance and value of wearing masks in protecting against spread of this virus. All major medical societies and the CDC are in agreement about the value of masks in reducing transmission.

Out of respect and concern for our friends and loved ones, practice these measures which have been proven to be effective. If we do, we will sooner be able to return to work and school safely. We can reduce the unnecessary tragedy of hospitalizing sick and dying members of our families, our co-workers and friends, and our community.

Keck Hartman MD

Infectious Disease Consultants

Hello Jamie

I am a visual learner and some of your county commissioners may be as well. At the 5:00 minute mark, the speaker says "Wearing a mask can dramatically reduce the chance of spreading COVID." This video is well done and explains many valid points.

PBS Informative Video: <https://www.youtube.com/watch?v=0Tp0zB904Mc>

That is my medical opinion as well. Masks should be required because they do work and we are having higher numbers of new infections now than we were a month ago. I recommend continued mask use through New Year's Day or until the number of new cases significantly drops, whichever is longer.

Subject: Re: Statement to County Commissioners on masking

Masks should be strongly encouraged at any public or private congregate; public or private business and vehicles carrying members other than immediate family.

Butler County Commissioners,

I am Dr. Amy Seeber, Internal Medicine, affiliated with Susan B. Allen Memorial Hospital in El Dorado. You may remember me as one of the doctors who asked you to uphold Governor Kelly's mask mandate at an early July commission meeting. I stood before you again two weeks later after our numbers had risen to ask you to reinstate the county's Covid19 emergency declaration. I would be standing before you on Tuesday to discuss the Governor's new mask mandate, but I am just too busy working with multiple Covid19 patients to be able to be there in person.

As I stated in July, the best time to get a pandemic under control is before it starts. Unfortunately, that time has passed and we have uncontrolled community spread of the disease. Our local health department is overwhelmed and our community hospitals are overwhelmed as well. We have had to increase the size of our dedicated Covid unit in the last week and I fear we will need to increase it again in the near future. Already, we have had to delay admissions to our local hospital or transfer patients to hospitals as far as three hours away to get people the care they need because our beds were full or we lacked enough staff to properly care for them.

We can no longer expect to stop this epidemic, the best we can do is slow it down. Hospital personnel are a limited resource. Becoming a physician takes a minimum of 11 years of work post-high school. Nurse practitioners, physician assistants, floor nurses, respiratory therapists, all need years of specialized training to do their jobs. You can't take someone off the street, give them a crash course in ventilator management, and expect them to be able to care for a critically ill patient. It's not just patients with Covid who suffer when our medical systems are overwhelmed. It's people with heart attacks, strokes, trauma, etc., who can't get timely care that suffer and die because the specialty care they need is just not available due to the sheer volume of patients.

Lauren Morrill, author, states "I don't know how to explain to you why you should care about other people". Butler County Commissioners, who function as our county board of health, have a duty and obligation to care for the health and wellness of our residents. Butler County NEEDS a mask mandate to slow the spread of the virus. With Thanksgiving, the holiday shopping season, Christmas, and New Year's the amount of time people spend together will increase and our numbers will inevitably rise. How steeply they rise depends on what mitigating factors we as a society and YOU as a commission, put into force. A mask mandate will help slow the spread of the virus and give our overwhelmed health facilities a fighting chance to save more people. Please take into consideration the many lives you could potentially save when making your decision.

Sincerely,
Amy Seeber MD

Hello,

I was asked to share my opinion on masks in public. While I do not have as much of an informed opinion as other physicians being a specialist of the foot and ankle, I will share my opinion nonetheless.

I like the current way Butler is doing the mask issue, recommending but not forcing and letting the individual businesses decide for themselves.

The masks people are wearing, and how they are wearing them is not helping. Unless everyone had N95 masks, and had them properly fitted and used proper handling, due to the size of the virus, all other masks provide only protection against large droplet, in a similar manner to sneezing into an elbow instead of uncovered. Wichita which has mask mandates, is no better off than Butler county. Similar data can be easily obtained from other cities, states and countries. Nothing feels sillier than going to a restaurant in Wichita, putting a mask on to walk 10 seconds to a table, and then take it off.

Regardless, I'll continue to wear my mask at the places required.

Regards,

Subject: Re: Statement to County Commissioners on masking

Hi Francia-

Thank you for reaching out. It is my opinion that there needs to be a mask mandate in place at this time.

Numbers are increasing in our area and even if you are under the belief that masks don't help decrease the spread (which is not accurate) we do know there is no harm by wearing one.

We wear masks in the OR to prevent the spread of infection while you have an open incision. We have evidence this actually does decrease infection rates of surgical wounds. So, if we need to decrease the spread in the community why wouldn't the same concept work?

Just my initial thought. If I think of any other I'll let you know.

Dear Commissioners,

I urge you to allow the statewide mask mandate to apply to Butler County by NOT opting out. Please reference the CDC report released on 11/20/2020 wherein drastically different outcomes were noted in counties that observed the previous statewide mandate compared to counties that opted out. The incidence of Covid-19 decreased in the 24 counties with mask mandates, and continued to increase in the 81 non-mandated counties. The CDC considered potential confounding issues, such as other mitigation strategies undertaken by some counties, and concluded that the mask mandate and resultant use of masks reduced the spread of Covid-19 in compliant counties.

As the elected leaders responsible for ensuring the health and safety of Butler County residents, your duty in this matter is to make the decision that best accomplishes that goal, regardless of your personal opinion or political persuasion. Please consider the life and health of Butler County residents as the precious commodities they are, and take the brave and necessary steps to preserve them, by allowing the statewide mask mandate to stand as ordered.

Sincerely,

Cathy Cooper, M.D.

Community Comments:

Commissioners:

Imagine my surprise and embarrassment as I was listening to the national news this morning and Kansas is one of the headlines. Kansas is one of the top five states where Covid cases have hit a record high increase over the last seven days. As of Friday, November 20, Butler County reached 1,778 cases with eight deaths. According to city their active cases were as follows: El Dorado-58, Augusta-47, Douglass-8, Rose Hill-20, Andover-84, Towanda-9, Benton-5, Whitewater-1, Potwin-3, Leon-1, Latham-2, Rpsalia-3 and Cassoday-2.

In El Dorado alone the following have taken additional precautions because of Covid: the Driver's License and Motor Vehicle offices are closed due to staff shortages caused by Covid, the Health Department is stretched to capacity because of Covid, First Baptist Church Day Care is shut down for two weeks because of Covid, the City of El Dorado has closed their facilities to the public till further notice because of Covid, the Parks and Rec Department was shut down because of Covid and several churches have discontinued in person worship. They are closed because there is a staffing shortage, staff who are quarantined and/or staff who are ill or caring for ill family members. The hospitals in the county are stretched thin for the same reasons.

It is time for the commissioners to look past their personal feeling on the pandemic and act in the best interest of the people in Butler County. You can no longer leave it up to people to do the right thing because they aren't and won't. This is not a political issue or a constitutional issue, this is a public health issue and part of your job is to protect the people of Butler to the best of your ability. Listen to the medical community and the director of the health department. Their information is vital to your decisions and with the highest concern for the people of Butler.

We cancelled the family Thanksgiving but would I love to host the family Christmas. I want my grandchildren to be in school not remote. They have missed out on so, so much from not having in-person learning and seeing their friends. They lost so much last spring and are now missing out this fall as they jump from in-person learning to remote learning, back and forth, back and forth.

The Governor passed a mask mandate to take effect on Wednesday, November 25. I respectfully ask that the commissioners adopt the mandate for Butler County. Let the people of Butler know that you are concerned about their health and their families health. Your decision will also reflect your respect for our first responders, our doctors, our nurses and other medical personnel and our educators. This has gone on for ten months and there is no sign of letting up without the commissioners stepping up and leading the way.

Respectfully,
Kendra Wilkinson

I am have been a resident of Butler County, KS for about 70 years and given the exponential spread of Corona virus, I would expect the Health Department to take specific actions to protect the citizens of the county. Action delayed is an irresponsible approach to mitigating the spread of this virus. Action should be immediate by mandating that wearing a mask is required in any confined place or gathering among any number of people in open spaces. Further, certain businesses should be restricted to limiting the number of people dependent upon square feet of the facility. Businesses like gyms, beauty salons, barber shops, sports bars, restaurants & etc., should require patrons and employees to wear masks, limit hours, maintain at least 6 Ft. separation, (keep chairs, payment machines, door handles, counter tops, other patron used equipment)disinfected, and if possible improve ventilation systems. Since people are more concerned about their freedom than their health or their fellow citizens health a penalty is REQUIRED because as a society we are of the opinion that we can do as we please and NOBODY IS GOING TO TELL THEM WHAT THEY CAN OR CANNOT DO. It's too bad, that this is true, but if they were more scientifically minded, they would understand that protecting others will ultimately help protect them by reducing the spread of the virus.

Regards, Orin Baker

Respectfully I reach out to you to express my concern of how the commissioners are handling the Covid pandemic. I've had Covid and still dealing with serious medical issues because of it.

Sonja Baughman

11/23/2020

Butler County Commissioner,

I am writing to provide information in support of the Kansas state Executive order 20 – 68 establishing a face coverings protocol.

In the Executive Order it states clearly states the difficulties being faced by Kansas, the economy, the healthcare systems, and our citizens. It clearly reports the ease of individuals wearing masks to reduce the spread of COVID-19 and the goals of keeping the economy running and helping the healthcare system be able to meet the needs of the citizens of our state.

As a member of the healthcare system in our county I know that the increasing number of individuals requiring hospital care for COVID-19 is impacting our ability to provide care for others. The patients that needed care before the pandemic continue to need care: for cardiac issue, trauma, stroke, and pneumonia.

Throughout the last 9 months Kansas Medical Center has been providing care to COVID patients as well as others in need of healthcare. Lately they have been on diversion/unable to accept COVID patients. They have reported days they are unable to take any additional patients.

At Susan B. Allen Memorial Hospital this past week we increased the number beds to accept COVID patients. We also move a nurse from providing care to non-COVID patients to the unit where we care for the COVID patients. This past week we have had days with all COVID beds full. We have had days that patients remained in the ED in the special negative pressure rooms until we had a room for them on the COVID unit, a vacancy created when a patient was well enough to be dismissed home or to a nursing facility. Before this surge our COVID unit had long periods of time without patients. We have had patients on the COVID unit consistently since November third.

Throughout this pandemic Butler County patients have received care in Sedgwick County as well as in Butler County. In an effort to find appropriate care for COVID and non-COVID patients alike, hospitals must contact multiple locations until an appropriate and available bed is located. Then ambulances are using resources to

transport patients to the facility that can provide the care. We have accepted at least three patients for the COVID unit from non-contiguous counties and one patient from north central Kansas that needed an ICU bed. It is known that patients at Susan B. Allen were transported by air because there were not services available for them in Wichita.

Please consider the evidence that is widely communicated by experts. I've included the MMWR November 20, 2020 publication that reports the research from Kansas data following the summer mask mandate and the "opt out" option.

Please consider the following from the CDC website:

Experimental and epidemiological data support community masking to reduce the spread of SARS-CoV-2. The prevention benefit of masking is derived from the combination of source control and personal protection for the mask wearer. The relationship between source control and personal protection is likely complementary and possibly synergistic¹⁴, so that individual benefit increases with increasing community mask use. Further research is needed to expand the evidence base for the protective effect of cloth masks and in particular to identify the combinations of materials that maximize both their blocking and filtering effectiveness, as well as fit, comfort, durability, and consumer appeal. Adopting universal masking policies can help avert future lockdowns, especially if combined with other non-pharmaceutical interventions such as social distancing, hand hygiene, and adequate ventilation.

Please consider your responsibility as the Local Board of Health, consider public health needs, consider the danger of continuing to overload the healthcare system, and consider the needs of our economy. Please do not opt-out of this Executive Order.

Sincerely,

Cecilia Goebel
Chief Nursing Officer

Subject: Re: Statement to County Commissioners on masking

Covid19 activity is surging in South-Central Kansas. Reno, Sedgwick, and Butler counties are all seeing a record number of cases and test positivity rates. The Wichita area and surrounding hospitals are at critical capacity. All have been intermittently on diversion since October.

In the hospitals we are caring for your friends, co-workers, and loved ones who are ill with this pandemic virus. Some of them are not doing well, despite the best available medical care and heroic efforts by the nurses and other professional medical staff.

By now, all of us know the right thing to do to protect our friends, loved ones, and neighbors. Reducing the risk of spreading this dangerous virus is as easy as wearing masks, continuing to physically distance, and frequent hand cleansing. There are very few other viruses or illness being transmitted in our community right now. If you are ill, it is likely due to Covid19, so stay home and isolate. Show respect to our community by doing your part to decrease transmission.

There is really no legitimate argument against the importance and value of wearing masks in protecting against spread of this virus. All major medical societies and the CDC are in agreement about the value of masks in reducing transmission.

Out of respect and concern for our friends and loved ones, practice these measures which have been proven to be effective. If we do, we will sooner be able to return to work and school safely. We can reduce the unnecessary tragedy of hospitalizing sick and dying members of our families, our co-workers and friends, and our community.

Keck Hartman MD

Infectious Disease Consultants

Hello Jamie

I am a visual learner and some of your county commissioners may be as well. At the 5:00 minute mark, the speaker says "Wearing a mask can dramatically reduce the chance of spreading COVID." This video is well done and explains many valid points.

PBS Informative Video: <https://www.youtube.com/watch?v=0Tp0zB904Mc>

That is my medical opinion as well. Masks should be required because they do work and we are having higher numbers of new infections now than we were a month ago. I recommend continued mask use through New Year's Day or until the number of new cases significantly drops, whichever is longer.

Subject: Re: Statement to County Commissioners on masking

Masks should be strongly encouraged at any public or private congregate; public or private business and vehicles carrying members other than immediate family.

Butler County Commissioners,

I am Dr. Amy Seeber, Internal Medicine, affiliated with Susan B. Allen Memorial Hospital in El Dorado. You may remember me as one of the doctors who asked you to uphold Governor Kelly's mask mandate at an early July commission meeting. I stood before you again two weeks later after our numbers had risen to ask you to reinstate the county's Covid19 emergency declaration. I would be standing before you on Tuesday to discuss the Governor's new mask mandate, but I am just too busy working with multiple Covid19 patients to be able to be there in person.

As I stated in July, the best time to get a pandemic under control is before it starts. Unfortunately, that time has passed and we have uncontrolled community spread of the disease. Our local health department is overwhelmed and our community hospitals are overwhelmed as well. We have had to increase the size of our dedicated Covid unit in the last week and I fear we will need to increase it again in the near future. Already, we have had to delay admissions to our local hospital or transfer patients to hospitals as far as three hours away to get people the care they need because our beds were full or we lacked enough staff to properly care for them.

We can no longer expect to stop this epidemic, the best we can do is slow it down. Hospital personnel are a limited resource. Becoming a physician takes a minimum of 11 years of work post-high school. Nurse practitioners, physician assistants, floor nurses, respiratory therapists, all need years of specialized training to do their jobs. You can't take someone off the street, give them a crash course in ventilator management, and expect them to be able to care for a critically ill patient. It's not just patients with Covid who suffer when our medical systems are overwhelmed. It's people with heart attacks, strokes, trauma, etc., who can't get timely care that suffer and die because the specialty care they need is just not available due to the sheer volume of patients.

Lauren Morrill, author, states "I don't know how to explain to you why you should care about other people". Butler County Commissioners, who function as our county board of health, have a duty and obligation to care for the health and wellness of our residents. Butler County NEEDS a mask mandate to slow the spread of the virus. With Thanksgiving, the holiday shopping season, Christmas, and New Year's the amount of time people spend together will increase and our numbers will inevitably rise. How steeply they rise depends on what mitigating factors we as a society and YOU as a commission, put into force. A mask mandate will help slow the spread of the virus and give our overwhelmed health facilities a fighting chance to save more people. Please take into consideration the many lives you could potentially save when making your decision.

Sincerely,
Amy Seeber MD

Hello,

I was asked to share my opinion on masks in public. While I do not have as much of an informed opinion as other physicians being a specialist of the foot and ankle, I will share my opinion nonetheless.

I like the current way Butler is doing the mask issue, recommending but not forcing and letting the individual businesses decide for themselves.

The masks people are wearing, and how they are wearing them is not helping. Unless everyone had N95 masks, and had them properly fitted and used proper handling, due to the size of the virus, all other masks provide only protection against large droplet, in a similar manner to sneezing into an elbow instead of uncovered. Wichita which has mask mandates, is no better off than Butler county. Similar data can be easily obtained from other cities, states and countries. Nothing feels sillier than going to a restaurant in Wichita, putting a mask on to walk 10 seconds to a table, and then take it off.

Regardless, I'll continue to wear my mask at the places required.

Sonja Baughman

Trends in County-Level COVID-19 Incidence in Counties With and Without a Mask Mandate — Kansas, June 1–August 23, 2020

Miriam E. Van Dyke, PhD¹; Tia M. Rogers, PhD¹; Eric Pevzner, PhD²; Catherine L. Satterwhite, PhD³; Hina B. Shah, MPH⁴; Wyatt J. Beckman, MPH⁴; Farah Ahmed, PhD⁵; D. Charles Hunt, MPH⁴; John Rule⁶

Wearing masks is a CDC-recommended* approach to reduce the spread of SARS-CoV-2, the virus that causes coronavirus disease 2019 (COVID-19), by reducing the spread of respiratory droplets into the air when a person coughs, sneezes, or talks and by reducing the inhalation of these droplets by the wearer. On July 2, 2020, the governor of Kansas issued an executive order[†] (state mandate), effective July 3, requiring masks or other face coverings in public spaces. CDC and the Kansas Department of Health and Environment analyzed trends in county-level COVID-19 incidence before (June 1–July 2) and after (July 3–August 23) the governor's executive order among counties that ultimately had a mask mandate in place and those that did not. As of August 11, 24 of Kansas's 105 counties did not opt out of the state mandate[§] or adopted their own mask mandate shortly before or after the state mandate was issued; 81 counties opted out of the state mandate, as permitted by state law, and did not adopt their own mask mandate.

After the governor's executive order, COVID-19 incidence (calculated as the 7-day rolling average number of new daily cases per 100,000 population) decreased (mean decrease of 0.08 cases per 100,000 per day; net decrease of 6%) among counties with a mask mandate (mandated counties) but continued to increase (mean increase of 0.11 cases per 100,000 per day; net increase of 100%) among counties without a mask mandate (nonmandated counties). The decrease in cases among mandated counties and the continued increase in cases in nonmandated counties adds to the evidence supporting the importance of wearing masks and implementing policies requiring their use to mitigate the spread of SARS-CoV-2 (1–6). Community-level mitigation strategies emphasizing wearing masks, maintaining physical distance, staying at home when ill, and enhancing hygiene practices can help reduce transmission of SARS-CoV-2.

The Kansas mandate requiring the wearing of face coverings in public spaces became effective July 3, 2020. Data on county mask mandates were obtained from the Kansas Health Institute.[¶] A Kansas state law** enacted on June 9, 2020, authorizes counties to issue public health orders that are less stringent than the provisions of statewide executive orders issued by the governor, which allowed counties to opt out of the state mask mandate. For this study, counties in Kansas that, as of August 11, 2020, did not opt out of the state mandate or adopted their own mask mandate were considered to have a mask mandate in place; those that opted out of the state mandate and did not adopt their own mask mandate were considered to not have a mask mandate in place.

* https://www.cdc.gov/coronavirus/2019-ncov/more/masking-science-sars-cov2.html?fbclid=IwAR28PppCa6x2uxwO8Z2baHM0KHS4jXx0inzzMQs3zRHV1qqL_0a8mxZfpCw. <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cloth-face-cover-guidance.html>.

† <https://governor.kansas.gov/wp-content/uploads/2020/07/20200702093130003.pdf>.

§ Allen, Atchison, Bourbon, Crawford, Dickinson, Douglas, Franklin, Geary, Gove, Harvey, Jewell, Johnson, Mitchell, Montgomery, Morris, Pratt, Reno, Republic, Saline, Scott, Sedgwick, Shawnee, Stanton, and Wyandotte counties. Data on county orders were collected through point-in-time surveys of local health department and other county officials and were supplemented with online searches for published orders and announcements on social media and local news sites. Text in the county orders was analyzed to determine whether mask mandates were in place as of August 11, 2020. Counties that took no official action to opt out of the state mask mandate or adopted their own mask mandate shortly before or after the state mandate were considered to have a mask mandate in place. Counties were considered to not have a mask mandate in place if they took official action to opt out of the state mask mandate and did not adopt their own mask mandate or if their official action used only the language of guidance (e.g., "should" or "recommend").

¶ <https://www.khi.org/policy/article/20-25>. https://www.khi.org/assets/uploads/news/15015/august_11_update1105.pdf.

** https://ag.ks.gov/docs/default-source/documents/addendum-3-to-march-24-law-enforcement-duties-and-authorities-memo.pdf?sfvrsn=d088af1a_3.

Daily county-level COVID-19 incidence (cases per 100,000 population) was calculated using case and population counts accessed from USAFacts^{††} for Kansas counties during June 1–August 23.^{§§} Rates were calculated as 7-day rolling averages. Segmented regression^{¶¶} was used to examine changes in COVID-19 incidence before and after July 3, 2020, among mandated and nonmandated counties. Mandated and nonmandated counties were compared to themselves over time, allowing for the control of constant county-related characteristics (e.g., urbanicity or rurality) that might otherwise confound a comparison between mandated and nonmandated counties. Sensitivity analyses were also conducted by 1) examining incidence trends after July 3 separately among mandated counties with and without other public health mitigation strategies and 2) recategorizing nonmandated counties that included cities mandating masks (n=6) as mandated counties. Analyses were conducted using SAS software (version 9.4; SAS Institute).

As of August 11, 24 (23%) Kansas counties had a mask mandate in place, and 81 did not. Mandated counties accounted for two thirds of the Kansas population (1,960,703 persons; 67.3%)^{***} and were spread throughout the state, although they tended to cluster together. Six (25%) mandated and 13 (16%) nonmandated counties were metropolitan areas.^{†††} Thirteen (54%) mandated counties and seven (9%) nonmandated counties had implemented at least one other public health mitigation strategy not related to the use of masks (e.g., limits on size of gatherings and occupancy for restaurants). During June 1–7, 2020, the 7-day rolling average of daily COVID-19 incidence among counties that ultimately had a mask mandate was three cases per 100,000, and among counties that did not, was four per 100,000 (Table). By the week of the governor's executive order requiring masks (July 3–9), COVID-19 incidence had increased 467% to 17 per 100,000 in mandated counties and 50% to six per 100,000 among nonmandated counties. By August 17–23, 2020, the 7-day rolling average

COVID-19 incidence had decreased by 6% to 16 cases per 100,000 among mandated counties and increased by 100% to 12 per 100,000 among nonmandated counties.

Trend analyses using segmented regression (Figure) indicated that during June 1–July 2, 2020, the COVID-19 7-day rolling average incidence increased each day in both counties that ultimately had mask mandates in place (mean increase = 0.25 cases per 100,000 per day; 95% confidence interval [CI] = 0.17–0.33) and counties that did not (mean increase = 0.08 cases per 100,000 per day; 95% CI = 0.01–0.14). After the governor's executive order, COVID-19 incidence decreased each day in mandated counties (mean decrease = 0.08 cases per 100,000 per day; 95% CI = –0.14 to –0.03); in nonmandated counties, incidence continued to increase each day (mean increase = 0.11 cases per 100,000 per day; 95% CI = 0.01–0.21).

Discussion

After implementation of mask mandates in 24 Kansas counties, the increasing trend in COVID-19 incidence reversed. Although rates were considerably higher in mandated counties than in nonmandated counties by the executive order, rates in mandated counties declined markedly after July 3, compared with those in nonmandated counties. Kansas counties that had mask mandates in place appear to have mitigated the transmission of COVID-19, whereas counties that did not have mask mandates continued to experience increases in cases.

The findings in this report are consistent with declines in COVID-19 cases observed in 15 states and the District of Columbia, which mandated masks, compared with states that did not have mask mandates (7). Mask requirements were also implemented as part of a multicomponent approach in Arizona, where COVID-19 incidence stabilized and then decreased after implementation of a combination of voluntary and enforceable community-level mitigation strategies, including mask requirements, limitations on public events, enhanced sanitation practices, and closures of certain services and businesses (8). The combining of community-level mitigation strategies including physical distancing and enhanced hygiene practices, in addition to consistent and correct use of masks, is a CDC-recommended approach.^{§§§} The decreased COVID-19 incidence among mask-mandated counties in Kansas occurred during a time when the only other state mandates issued were focused on mitigation strategies for schools as they reopened in mid-August. In at least 13 (54%) of the 24 mandated counties, the mask mandates occurred alongside other county-level recommended or mandated mitigation strategies (e.g., limits on

^{††} <https://usafacts.org/visualizations/coronavirus-covid-19-spread-map>.

^{§§} August 23, 2020, was selected as the study end date because most Kansas counties had already started or were about to begin school the week of August 24, 2020. The implementation of in-person schooling would have signified an important change in events influencing COVID-19 incidence rates after the executive order.

^{¶¶} Generalized estimating equation regression modeling with an autoregressive correlation variance structure was used to estimate trends over time within counties. Trends in 7-day rolling average of daily COVID-19 incidence among mask mandated counties and among non-mask-mandated counties were analyzed separately before (June 1–July 2, 2020) and after (July 3–August 23, 2020) the governor's executive order requiring masks, effective July 3.

^{***} Total population in mask-mandated counties = 1,960,703; total population in non-mask-mandated counties = 952,611; based on 2019 U.S. Census data.

Incidence ^{§§}	4	6	12	50	100

Abbreviations: COVID-19 = coronavirus disease 2019; mandated = counties with a mask mandate; N/A = not applicable; nonmandated = counties without a mask mandate.

* Counties that as of August 11 did not opt out of the state mandate or adopted their own mask mandate shortly before or after the state mandate include Allen, Atchison, Bourbon, Crawford, Dickinson, Douglas, Franklin, Geary, Gove, Harvey, Jewell, Johnson, Mitchell, Montgomery, Morris, Pratt, Reno, Republic, Saline, Scott, Sedgwick, Shawnee, Stanton and Wyandotte. Total population in mask-mandated counties = 1,960,703 based on 2019 U.S. Census Bureau data.

† Counties that took no official action to opt out of the state mask mandate or adopted their own mask mandate shortly before or after the state mandate were considered to have a mask mandate in place. Counties were considered to not have a mask mandate in place if they took official action to opt out of the state mask mandate and did not adopt their own mask mandate or if their official action used only the language of guidance (e.g., “should” or “recommend”). Total population in non-mask-mandated counties = 952,611 based on 2019 U.S. Census Bureau data.

§ Week of governor’s executive order (effective July 3, 2020).

¶ Change in incidence = [(incidence in period – incidence in previous period)/incidence in previous period] X 100.

** Data on county orders were collected through point-in-time surveys of local health department and other county officials and were supplemented with online searches for published orders and announcements on social media and local news sites. Text in the county orders was analyzed to determine whether mask mandates were in place as of August 11, 2020.

†† Seven-day rolling average number of new daily cases.

§§ Seven-day rolling average number of new daily cases per 100,000 population.

size of gatherings and occupancy for restaurants), facilitating a potential synergistic effect resulting from combining community mitigation strategies. However, in sensitivity analyses, similar decreases in COVID-19 incidence after July 3 were observed among mandated counties with and without other mitigation strategies. Therefore, although implementing multiple mitigation strategies is the recommended approach, strategies related to mask use mandates appear to be important. Additional information on the utility and acceptability of mask mandates in public settings could help further inform health education campaigns aimed at increasing proper use of masks and strengthening mandate adherence.

The findings in this report are subject to at least four limitations. First, the ecologic design of this study and limited information on community mask-wearing behaviors and county implementation and enforcement provisions of mask mandates limit the ability to determine the extent to which the countywide mask mandates accounted for the observed declines in COVID-19 incidence in mandated counties. Second, this analysis did not account for mask ordinances in six cities in non-mask-mandated counties. However, in sensitivity analyses recategorizing nonmandated counties that included cities mandating masks as mandated counties, results were consistent with those in primary analyses, although they were attenuated. In those analyses, after the governor’s executive order, COVID-19 incidence among mandated counties stabilized rather than decreased, and incidence continued to

Summary

What is already known about this this topic?

Wearing face masks in public spaces reduces the spread of SARS-CoV-2.

What is added by this report?

The governor of Kansas issued an executive order requiring wearing masks in public spaces, effective July 3, 2020, which was subject to county authority to opt out. After July 3, COVID-19 incidence decreased in 24 counties with mask mandates but continued to increase in 81 counties without mask mandates.

What are the implications for public health practice?

Countywide mask mandates appear to have contributed to the mitigation of COVID-19 transmission in mandated counties. Community-level mitigation strategies emphasizing use of masks, physical distancing, staying at home when ill, and enhanced hygiene practices can help reduce the transmission of SARS-CoV-2.

increase among nonmandated counties. Third, although the design of this study limits potential confounding from constant county-related characteristics, the findings in this report are conditional on the absence of any time-varying factors (e.g., mobility patterns, changes in other community-level mitigation strategies, and access to testing) within counties before and after July 3. Nonetheless, in additional analyses examining testing data among Kansas counties during the study period,

FIGURE. Trends* in 7-day rolling average of new daily COVID-19 cases per 100,000 population among mask-mandated† and non-mask-mandated counties before (June 1–July 2)[§] and after (July 3–August 23)[¶] the governor's executive order requiring masks — Kansas, June 1–August 23, 2020

Abbreviation: COVID-19 = coronavirus disease 2019.

* Generalized estimating equation regression modeling with an autoregressive correlation variance structure was used to estimate trends over time within counties. Trends in 7-day rolling average of daily COVID-19 incidence among mask-mandated counties and non-mask-mandated counties were analyzed separately before (June 1–July 2, 2020) and after (July 3–August 23, 2020) the governor's executive order requiring masks, effective July 3.

† Kansas counties (n = 24) that as of August 11 did not opt out of the state mandate effective July 3, 2020, or adopted their own mask mandate shortly before or after the state mandate include Allen, Atchison, Bourbon, Crawford, Dickinson, Douglas, Franklin, Geary, Gove, Harvey, Jewell, Johnson, Mitchell, Montgomery, Morris, Pratt, Reno, Republic, Saline, Scott, Sedgwick, Shawnee, Stanton and Wyandotte. Data on county orders were collected through point-in-time surveys of local health department and other county officials and were supplemented with online searches for published orders and announcements on social media and local news sites. Text in the county orders was analyzed to determine whether mask mandates were in place as of August 11, 2020. Counties that took no official action to opt out of the state mask mandate or adopted their own mask mandate shortly before or after the state mandate were considered to have a mask mandate in place. Counties were considered to not have a mask mandate in place if they took official action to opt out of the state mask mandate and did not adopt their own mask mandate or if their official action used only the language of guidance (e.g., "should" or "recommend").

§ Before the mask mandate (June 1–July 2), 7-day rolling average COVID-19 incidence increased each day (mean increase = 0.25 cases per 100,000 persons per day; 95% confidence interval [CI] = 0.17–0.33) in mask-mandated counties and increased each day (mean increase = 0.08 cases per 100,000 per day; 95% CI = 0.01–0.14) in nonmandated counties.

¶ After the mask mandate (July 3–August 23), 7-day rolling average COVID-19 incidence decreased each day (mean decrease = 0.08 cases per 100,000 persons per day; 95% CI = –0.14 to –0.03) in mask-mandated counties and increased each day (mean increase = 0.11 cases per 100,000 per day; 95% CI = 0.01–0.21) in nonmandated counties.

testing rates were observed to increase overall over time. Therefore, despite increases in testing during this period, decreases in COVID-19 incidence were observed in mandated counties after July 3. Finally, counties in Kansas with a mask mandate might not be representative of other U.S. counties. However, the findings are consistent with observations from other states that mask mandates are associated with declines in COVID-19 cases (7).

Masks are an important intervention for mitigating the transmission of SARS-CoV-2 (1–6), and countywide mask

mandates appear to have contributed to the mitigation of COVID-19 spread in Kansas counties that had them in place. Community-level mitigation strategies emphasizing use of masks, physical distancing, staying at home when ill, and enhanced hygiene practices can help reduce the transmission of SARS-CoV-2.

Subject: RE: For Review: City Ordinance Requiring Masks/Face Coverings

Thank you for the opportunity to provide comments regarding the mask mandate for our City Commission.

Susan B. Allen Memorial Hospital (SBAMH) has had a mask requirement to enter our hospital since April 15, 2020. We established this very early to protect the safety and health of our staff, patients and providers. With the threat of COVID-19 growing in our community exponentially, the risk for us to encounter an asymptomatic or pre-symptomatic patient increases. Any one of us might even be the person who is asymptomatic or pre-symptomatic.

We stay in communication with our colleagues at the Kansas Hospital Association regarding proper usage for Face Shields, Procedural/Surgical Masks and Fabric Masks to ensure we are following the most recent recommendations from the Center for Disease Control and Occupational Safety & Health Administration for the protection of our Health Care Personnel. Based on those recommendations and to keep our employees at SBAMH as safe and healthy as we possibly can, we implemented the Face Shield and Face Mask expectations. We feel this requirement helps the safety and spread of COVID-19 to our staff, providers and patients and then in turn protects the families of those in our community. We also strongly encourage our employees to practice principles of social distancing, respiratory etiquette and frequent hand hygiene. Any employee who has direct patient care is also required to follow specific steps to change their uniform/scrub apparel while at the hospital, before beginning their commute home.

We understand we have a controlled environment and staff that can enforce these regulations within the walls of SBAMH and this is not the case for our city and county. However, we support the idea of our community wearing masks to reduce potential COVID-19 exposure.

Subject: Re: For Review: City Ordinance Requiring Masks/Face Coverings

11/30/2020

Dear El Dorado City Commission,

I am sending this communication in support of the City of El Dorado implementing Governor Kelly's Executive Order 20-68 or a version thereof.

As a school district the virus is certainly taking its toll in several ways. We are seeing large numbers of cases and quarantines which affects our operations on a daily basis from students' education to staff availability to work. We currently have 29 COVID related absences by staff and 229 students. This truly affects how we operate that involve cooks, custodians, bus drivers, teachers, aides, etc. We are seeing a large majority of our cases are due to household contacts contracting the virus and not at school which in turn means it is coming from life outside of school.

Circle USD #375 implemented a mask mandate since the beginning of school on September 8th, I cannot imagine the potential increase of cases without wearing masks in our buildings. At that time, it was not a popular decision by some but overall the best for operating our district.

Masks and social distancing have proven to prevent the spread of the virus dramatically in our buildings. As noted, we are seeing the spread in the communities which eventually filtrate the schools due to us being the hub where all kids return. There is no doubt Executive Order 20-68 will have a positive effect in our community and our district as well. As this cliché goes, it is going to take all of us working together.

On a personal note, my family does not frequent businesses in El Dorado due to a minimal percentage wearing masks in those public places. Certainly, we have tried to shop and order carry out locally but we feel personal safety is a priority. I am positive masking would make it safer for business employees which in turn decreases staff absenteeism or shortage.

Once again, I urge El Dorado to implement Executive Order 20-68 or a version thereof to provide a safer place to live while providing a quality and safe education for all kids. Thank you for your consideration.

Thank you,

Subject: Impact of COVID-19 on El Dorado Public Schools

I never thought I would be writing to share with you the impact of COVID-19 on our schools as you consider the divisive issue of masks in our community. Let me begin by saying this is not a political issue for me. While I understand both perspectives, I feel it is imperative for you to know the impact this pandemic is having on our students, families, and staff.

When we returned to school in August, we initiated many policies designed to reduce risk factors and keep our students in class. We know the best place for our students to learn is in our classrooms, however, we find ourselves facing greater community spread of the disease which is beginning to impact our classrooms. As we evaluate the numbers on our weekly Surveillance Report, approximately 80-87% of our isolations and quarantines originate outside of the school setting.

As you know, our secondary buildings are on remote learning due to staffing shortages and KSHSAA will be implementing a “no spectator” policy at our athletic events and activities through the end of January. What keeps me up at night are the pieces you may not be aware of many of which may have ripple effects throughout our community.

We are facing similar staffing issues in other departments across the district including transportation and our elementary schools. As the number of COVID-19 cases in the community continue to rise, we are teetering on having to go remote at the elementary level as well. I realize the potential economic hardships that will create for our El Dorado families. Parents may have to stay home from their workplace to provide learning support for their children. The lost wages for families and the negative impact on our workforce, especially around the holidays, could be significant. Our businesses need us just as much as we need them.

I can promise you this...we are doing everything we can to stay afloat in the midst of a COVID-19 tidal wave. We owe it to our students, their families, and our community and we are committed to doing our part. I know you have difficult choices ahead and I am not advocating for either side. I am simply weighing in for our schools. We want to keep our elementary students in the classroom and to bring our secondary students back to school as soon as possible.

Thank you for your leadership!

USD 490 BOARD OF EDUCATION

Rob Lane • Heather Nichols • Haley Remsberg • Roger Smith • Tom Storrer • Sharon Waugh • Norm Wilks

We have seen an increase in 911 calls related to this recent surge of COVID positive test results. The actual positive or suspected positive patients we discover after arrival has only increased slightly. Overall, we have averaged 2 suspected or confirmed positive EMS transport requests per day (24 hours) county-wide. This is up from 1.7 patients per day for October in Butler County. The real impact from the recent COVID surge has been seen at the hospitals and the need to transport patients from hospital to hospital.

We feel the impact because even in years past, before COVID, there are limited healthcare resources and transport capability when a surge of respiratory disease or natural/manmade disaster occurs. Keri Korthals, Butler County Emergency Management Director, has posted the overall County COVID numbers and I believe hospital status.

In all of my career, the most controversial topic I have seen in medicine is the current masking debate. I believe proper masking helps prevent spread. I am no expert, but everything indicates that masking is only ONE of the many steps that the public should be using to protect themselves and others. Equally important are the other recommendations that have been consistently communicated and apply to all droplet or airborne transmitted bacterial and viral infectious disease – Hygiene (especially frequent handwashing for at least 20 seconds), blocking your cough or sneeze (even when wearing a mask), staying home when starting to feel ill (fever or not), social distancing, avoiding large groups (real number that is considered large is again subjective), adequate rest/sleep, healthy eating that includes diets supplemented with vitamin C, vitamin D and Zinc, exercise (especially in the sunlight to absorb additional vitamin D). There are many more that are on the list of recommendations.

Anecdotally, while in the Butler County community, I observe a high percentage of citizens wearing masks. A majority are cloth masks and many of them improperly sized or fitted or worn incorrectly. Up to this point, healthcare workers have utilized properly fitted surgical masks and/or N95 masks with proper education on how to wear them to protect ourselves from many different viral, fungal and bacterial microbes. This has been researched and validated over many years. Cloth masks, however, are so variable in material, construction, fit and how the general public wears them that research to show a benefit is hard to control for a consistent outcome. In my opinion, “do masks work”, should not be the question we continue to debate. It depends on the circumstances of proper construction, fit, when/how it is being used AND is a person utilizing all of the other preventative measures to help contain the germs that are being spread? Have we seen patients who have protected themselves with 100% cloth mask wearing, good hygiene, social distancing and avoiding crowds contract COVID? Yes. Some of them physicians who weren’t specifically caring for COVID positive patients, yet contracted COVID.

I do believe that the time, energy, emotional stress and money being spent on the masking debate is distracting away from all the other important disaster response resources needed to manage this pandemic. Education on proper mask selection for fit; how to properly put it on, how to wear it over your NOSE and mouth, and take it off; how and when they should be replaced or washed and what is the recommended washing to prevent bacteria build-up is warranted. Focusing time, energy and money on staffing solutions for First Response agencies, 911 dispatch centers, hospitals, long-term care facilities and schools who are losing staff to quarantine (whether they are symptomatic or non-symptomatic) is needed. The coordination of transporting patients (both COVID and everyday emergencies) from rural/frontier community hospitals to hospitals that have staffing/resources would make a large impact. Finally, the support needed for mental health resources and education on how to easily access these are essential.

Has compliance and enforcement of a masking mandate, that includes the proper fit and use, been successful anywhere in the US? Have these mandates further divided communities in the debate of public health vs. individual rights? How long did it take through public education, mandates (laws) and enforcement to change behavior for overall compliance of seatbelt usage or helmet wearing or speed limit?

Subject: Thank You!

Mr. Badwey

Your comments at the commission meeting were so right! You do not know how important I feel it is for Eldorado to do it's part to slow this crazy virus down!

It's scary to hear our medical nurses and doctors are stressed to their limit! Let's do what we can! Mr. Badwey Thank You, Thank You for your opinion and way of thinking! Don Wedel

We have seen an increase in 911 calls related to this recent surge of COVID positive test results. The actual positive or suspected positive patients we discover after arrival has only increased slightly. Overall, we have averaged 2 suspected or confirmed positive EMS transport requests per day (24 hours) county-wide. This is up from 1.7 patients per day for October in Butler County. The real impact from the recent COVID surge has been seen at the hospitals and the need to transport patients from hospital to hospital.

We feel the impact because even in years past, before COVID, there are limited healthcare resources and transport capability when a surge of respiratory disease or natural/manmade disaster occurs. Keri Korthals, Butler County Emergency Management Director, has posted the overall County COVID numbers and I believe hospital status.

In all of my career, the most controversial topic I have seen in medicine is the current masking debate. I believe proper masking helps prevent spread. I am no expert, but everything indicates that masking is only ONE of the many steps that the public should be using to protect themselves and others. Equally important are the other recommendations that have been consistently communicated and apply to all droplet or airborne transmitted bacterial and viral infectious disease – Hygiene (especially frequent handwashing for at least 20 seconds), blocking your cough or sneeze (even when wearing a mask), staying home when starting to feel ill (fever or not), social distancing, avoiding large groups (real number that is considered large is again subjective), adequate rest/sleep, healthy eating that includes diets supplemented with vitamin C, vitamin D and Zinc, exercise (especially in the sunlight to absorb additional vitamin D). There are many more that are on the list of recommendations.

Anecdotally, while in the Butler County community, I observe a high percentage of citizens wearing masks. A majority are cloth masks and many of them improperly sized or fitted or worn incorrectly. Up to this point, healthcare workers have utilized properly fitted surgical masks and/or N95 masks with proper education on how to wear them to protect ourselves from many different viral, fungal and bacterial microbes. This has been researched and validated over many years. Cloth masks, however, are so variable in material, construction, fit and how the general public wears them that research to show a benefit is hard to control for a consistent outcome. In my opinion, “do masks work”, should not be the question we continue to debate. It depends on the circumstances of proper construction, fit, when/how it is being used AND is a person utilizing all of the other preventative measures to help contain the germs that are being spread? Have we seen patients who have protected themselves with 100% cloth mask wearing, good hygiene, social distancing and avoiding crowds contract COVID? Yes. Some of them physicians who weren’t specifically caring for COVID positive patients, yet contracted COVID.

I do believe that the time, energy, emotional stress and money being spent on the masking debate is distracting away from all the other important disaster response resources needed to manage this pandemic. Education on proper mask selection for fit; how to properly put it on, how to wear it over your NOSE and mouth, and take it off; how and when they should be replaced or washed and what is the recommended washing to prevent bacteria build-up is warranted. Focusing time, energy and money on staffing solutions for First Response agencies, 911 dispatch centers, hospitals, long-term care facilities and schools who are losing staff to quarantine (whether they are symptomatic or non-symptomatic) is needed. The coordination of transporting patients (both COVID and everyday emergencies) from rural/frontier community hospitals to hospitals that have staffing/resources would make a large impact. Finally, the support needed for mental health resources and education on how to easily access these are essential.

Has compliance and enforcement of a masking mandate, that includes the proper fit and use, been successful anywhere in the US? Have these mandates further divided communities in the debate of public health vs. individual rights? How long did it take through public education, mandates (laws) and enforcement to change behavior for overall compliance of seatbelt usage or helmet wearing or speed limit?

Subject: Mask mandate

Good afternoon!

My name is Lynsie and I am a resident of Butler County, specifically El Dorado. I also own a business in El Dorado. I have 3 children as well. My oldest is a 2nd grader who is normally attending Grandview Elementary. I decided to pull her and home school her for many reasons this year, but one reason was because its not healthy for anyone, let alone a child to be wearing a mask for hours upon end to attend school. I did not want her in a mask all day long so I chose to pull her put.

A mask mandate should not be the way Butler County goes. This should be a medical CHOICE. Not everyone can wear a mask for multiple reasons. As well as the fact there is multiple credited sources showing the dangers of continuous mask use such as bacterial pneumonia. Increase in strep, quality of air, and inhaling mold spores that can grow on the mask even with continuous washing if cloth masks. As well as lowering ones immune system to naturally be able to fight off many viruses.

With the massive amounts of conflicting information in regards to masks I think it should not be something the government controls but should be a personal choice. Based on the decision of the individual and their families. I have medical reasons for myself to not wear one as well as my family but that does not keep us from being ridiculed daily when out in about in other counties with mask mandates. I have loved the fact that the governing body in Butler County has allowed us to have personal choice when it comes to this issue. I feel safe and happy in Butler County. Even as "case numbers" rise, the death percentage continues to go down. This virus, even with our most vulnerable population, has a 94% - 99% survival rate!

Please take in to account the actual studies and statistics and not just a handful of people making a stink about the fear that they see in the news!

Say no to a mask mandate please

Thank you

Lynsie- a wife, mother, business owner, and resident in Butler County

Tabitha,

I hope this email finds you doing well. As someone who works in El Dorado and who visits and shops in El Dorado regularly, I would ask that you relay to the Mayor and Commissioners my request for a mandatory mask ordinance in El Dorado.

The science is clear that masks slow the spread of the virus. Our local physicians and hospital staff and administrators have repeatedly ask people to listen to the science and wear masks. However, a good portion of the people I see in public places in El Dorado refuse to wear masks. We can no longer rely on people doing the right thing voluntarily and, therefore, we need the commission to demonstrate leadership for the good of the majority and pass a mask ordinance.

Thank you,

Justin Phillips

Subject: Mask Mandate and City Commissioners

Good Afternoon,

My name is Reagan McCune and I live in El Dorado. I would like to strongly encourage the city commissioners to do the right thing by implementing a mask mandate. I know multiple families that have been heavily affected by Covid-19 and we should all do our best to protect the community. A mask mandate in the city of El Dorado can help limit community exposure and help our hospital staff greatly. Essential workers are putting their lives at risk every day to keep our city running and safe. They need the community to do the same and protect them, while protecting we are protecting ourselves. I personally feel much safer shopping for groceries in Wichita because they have a mask mandate. It would be much safer for every party involved for a mask mandate in place. Please consider a mask mandate for my health and well being, but also your own. Stay safe and stay healthy.

Subject: Mask mandate

Hi there!

I understand that city commissioners will be meeting tomorrow evening to discuss a mask ordinance. I would like to take this time to urge the commissioners to implement a mask mandate as soon as possible... please pass this letter onto them if you don't mind.

I am one of the few nurses who work on the COVID unit at SBA hospital in El Dorado. For the past several weeks, there have been sick patients daily in the ER (or from doctors offices) waiting to be admitted. Our COVID unit has been at max capacity since we don't have enough staff, so the only way we can accept more patients is if one dies, or finally gets well enough to be dismissed. Our hospital is constantly scrambling to do what we can to take care of as many patients as safely possible but we can only do so much. Our community HAS to do something to help slow this down. Is a mask 100% effective at stopping the virus? No, of course not. But please do not ignore the science that has proven how wearing masks helps slows the spread. Look at what has happened since masks are no longer being enforced.

As a covid nurse, I truly feel more at-risk of getting the virus from being out in the community than I do taking care of covid patients at work. At least at work, I'm protected. I cannot say the same when I go to the grocery store or gas station, or any other business in El Dorado for that matter. We have several out-of-town staff members who drive to here from other counties and many have said how they avoid stopping anywhere in El Dorado because "people in this town don't care." They've seen how people don't wear masks in public areas or businesses, so they don't feel safe stopping here. Is that how you want the city of El Dorado to be seen by others?

I understand there are people in the community who will be upset if there is a mask mandate - no one likes being told what to do. But as commissioners, you are going to upset people no matter what you do, so why not err on the side of health and safety? Please, your local health care workers are begging for your help.

Thank you,
Jenny Valentine, RN, BSN

Subject: regarding mask mandate

Good day to you! My name is Jena Marshall (1002 S. Emporia) and a life long resident of El Dorado. I am contacting you regarding the item on the agenda- mask mandate. This may be a bit long, but it's just to get a point across of the way our family has to live.

My daughter is a 26 year old totally disabled person, whom is also a life long resident of El Dorado. She has resided with me her entire life. She can not speak, walk, eat, has no fine motor skills and extremely limited gross motor skills. She requires 24/7-365 day care. She is also vulnerable/compromised due to many bouts of aspiration pneumonia through the beginning of her life, along with not having certain immunizations due to severe allergic reactions. Since she was born, we have ALWAYS used masks, hand washing, sanitizing, distancing and also isolating during "sick season" (cold/flu season) per teaching and direction of several infectious disease doctors. So, from October until approximately end of April, she is not out in public unless absolutely necessary. If she must be, which is doctor appointments only, we cover her nose and mouth to help keep her safe. We (family and caregivers) use extreme caution when we have been out in public to ensure we do not bring any illness back to her; on occasion using some safety measures some may not think of. We wash, sanitize, and, at times, shower and change clothes before coming into direct contact with her. If anyone is sick, they don't come into contact with her at all. As I said, this has been life for us since she was born. The main time she can be more free from mask wearing/isolation is the end of April/beginning of May to September. Well, this year that did not happen. She has been unable to go to public for even simple activities (such as shopping.) or even doctors appointments since October of 2019. That is over a year. Many people are in the same situation. When the public at large refuse to follow precautions, including distancing, it leaves no choice for those who are vulnerable or compromised. Why is it ok for those who are "in good health" to be able to AT LEAST do their shopping while the "compromised" are locked up in their homes? We understand that a lot of people are looking at the death rate and consider it "low". We understand that they want things to be "normal". Their mind set is "if you are vulnerable/compromised/scared, stay at home". How long do they expect the "vulnerable/compromised" to stay locked up? HOW and WHY is this even considered acceptable? People are stating their mental health is suffering for not being able to play their sports, go on their outings, go shopping especially if only allowed to go out for necessities or quarantining for 14 days . Vulnerable/compromised people have not left their homes but a handful of times since March. Some have not left their homes at all. Is it not true that their mental health is suffering? Again, HOW and WHY is this acceptable? People argue making people wear masks is "against their rights". What about the rights of the people who have been locked up due to being vulnerable/compromised? It's not fear. It's knowing their bodies, knowing their health and knowing that it is a very high probability that they will not survive if they become infected with this virus. Some who may survive, what are the long term complications going to be for them? Without the assistance from the community as a whole, people are genuinely suffering...and the ones suffering are not the ones who are going about their lives as nothing is happening around them. The ones genuinely suffering are the vulnerable/compromised individuals remaining "locked up" because people refuse to do what is necessary to keep COVID-19 from spreading. Please take "the few" (vulnerable/compromised) into consideration, not just "the many" (healthy).

Thank you for your time and consideration in this controversial matter
Jena Marshall

Subject: Mask mandate

I fully support a City of El Dorado mask mandate to try to slow the spread of COVID 19. Many of our businesses are not enforcing their employees/customers wearing masks and too many people are only thinking of their own preference or convenience rather than that of others. We need to help our healthcare professionals and our most vulnerable citizens by wearing masks, social distancing and avoiding large gatherings. Please seriously consider implementing a mask mandate.

Thank you,
Carla Chrispens

Thank you for taking comments to provide to our city commissioners.

I understand this is a difficult time with a great deal of pressure to make potentially life altering decisions. As a citizen of El Dorado, I'm asking that you take politics and personal feelings out of the conversation and focus on the science. Please take a moment to connect with the health care professionals of El Dorado that you trust. There is a wealth of knowledge at the El Dorado Clinic and SBA. Ask the local experts about their needs and the health of our community. Though it might decrease your popularity, vote with science to help keep our community safe while using an abundance of caution.

Thank you for your service,
Amy Neuman.

I want to express my appreciation for our city and county officials giving our citizens the freedom to choose for ourselves whether masks should be worn. According to the recent county meeting, there hasn't been much difference between our percentages of positive cases vs. the percentage of positive cases in neighboring counties where masks are required.

I'm asking that you would please continue to trust our citizens to make good decisions regarding their health and that of others. This is a personal decision and should not be a requirement.

Thank you!

Hello, my name is Ava Wedel, owner of Thairapy Salon, Eldorado. I am encouraged that the city is considering a mask mandate. Our salon has required masks since July, and our guests have been 100% respectful of our mandate . I am hopeful that a mandate will encourage those who dont have a strong opinion on wearing masks, to wear them out of respect for others. Thank you for taking time to consider this.

Bill,

I have heard that there may be a mask mandate put in place and fines incurred on those that don't wear masks in ElDorado. We have been very supportive of ElDorado and Butler County throughout this whole Covid scare. We have been encouraging those from outlying counties and other cities that are forcing the mask issue to come to EDorado and shop.

I would strongly encourage you and the rest of the commission to NOT pass a mask mandate or fines.

Here is an article showing the ineffectiveness of masks from the CDC.

Thank you for your time,

Dean Good.

Have a Great Day!

Ladies and Gentlemen

We live in a time where it has never been more important for us to defend our basic freedoms. City, state, and federal governments are being pressured to insert themselves into people's lives and homes where government was never intended to reside. I have been so blessed to live in Butler County, and El Dorado, where, so far, my local government has recognized that we are intelligent people who are aware of the basic, common sense practices that have been posted, and have allowed us to take responsibility for ourselves and our families. Please prayerfully consider what your roll in government is before casting your vote. I have also attached a truly scientific study that our government and media purposely ignore to impose their will on the people. Government has become so blind to the lies of the media and the highly politicized "experts", that they blindly follow without fact checking what is being propagated. This study that I attached was not what comes up on Google when you search. Google shows you what they want you to believe, which is very seldom the truth. If we continue down this path, Government will continue to take our freedoms and liberties and we will soon find our country in a socialist society where all rights are taken away.

New Danish Study Finds Masks Don't Protect

Wearers From COVID Infection

A newly released study in the academic journal *Annals of Internal Medicine* casts more doubt on policies that force healthy individuals to wear face coverings.

Wednesday, November 18, 2020

Economics Masks Are masks effective? COVID-19 Danish Study University of Copenhagen Coronavirus
Annals of Internal Medicine Surgical Masks Mandates Ludwig von Mises CDC World Health Organization

-
-
-
-
-
-

Few issues are more contentious in modern American life than mandatory mask orders. And the debate is about to get even more heated.

A newly released study in the academic journal *Annals of Internal Medicine* casts more doubt on policies that force healthy individuals to wear face coverings in hopes of limiting the spread of COVID-19.

“Researchers in Denmark reported on Wednesday that surgical masks did not protect the wearers against infection with the coronavirus in a large randomized clinical trial,” the *New York Times* reports.

“Researchers in Denmark reported on Wednesday that surgical masks did not protect the wearers against infection with the coronavirus in a large randomized clinical trial.” <https://t.co/bKOENjCKVq>

— J.B. Handley (@GenRescue) November 18, 2020

The study is perhaps the best scientific evidence to date on the efficacy of masks.

To conduct the study, which ran from early April to early June, scientists at the University of Copenhagen recruited more than 6,000 participants who had tested negative for COVID-19 immediately prior to the experiment.

Half the participants were given surgical masks and instructed to wear them outside the home; the other half were instructed to not wear a mask outside the home.

Roughly 4,860 participants finished the experiment, the *Times* reports. The results were not encouraging.

“The researchers had hoped that masks would cut the infection rate by half among wearers. Instead, 42 people in the mask group, or 1.8 percent, got infected, compared with 53 in the unmasked group, or 2.1 percent. The difference was not statistically significant,” the *Times* reports.

Dr. Henning Bundgaard, lead author of the experiment and a physician at the University of Copenhagen, told the newspaper the results of his research are clear.

“Our study gives an indication of how much you gain from wearing a mask,” Bundgaard said. “Not a lot.”

The *Times* notes that the research “did not contradict growing evidence that masks can prevent transmission of the virus from wearer to others”—but adds that the study’s findings are at odds with the Centers for Disease Control and Prevention (CDC), which just last week endorsed the view that face coverings protect individuals from contracting the virus.

Two important things should be noted here, however.

The *Times* is correct that the study “did not contradict” evidence that suggests masks can prevent sick people from transmitting the virus to others. But the Danish study didn’t test for this; as the paper notes, only healthy people were tested in the experiment.

Second, there was never much dispute on whether sick people should wear a mask. From the beginning of the pandemic, public health officials agreed that infected people should wear a mask to reduce the likelihood of transmitting the virus to others.

“The masks are important for someone who is infected to prevent them from infecting someone else,” Dr. Anthony Fauci noted back in March on *60 Minutes*. “When you’re in the middle of an outbreak, wearing a mask might make people feel a little bit better, and it might even block a droplet. But it is not providing the perfect protection that people think that it is, and often there are unintended consequences; people keep fiddling with the mask and touching their face.”

Fauci would later modify his position, saying he discouraged masks out of concern of a supply shortage. But he was not wrong that mask wearing comes with unintended consequences, such as people touching their faces a lot. (Watch the video below if you doubt this.)

CDC chief Robert Ray Redfield Jr. has gone further than Fauci, declaring in public testimony that “this face mask is more guaranteed to protect me against COVID than when I take a COVID vaccine.”

However, Redfield’s assertion is not backed up with scientific evidence. As the authors of the Danish study point out, the World Health Organization “acknowledges that we lack evidence that wearing a mask protects healthy persons from SARS-CoV-2.”

.@CDCDirector Dr. Robert Redfield: "These face masks are the most important, powerful public health tool we have...I might even go so far as to say that this face mask is more guaranteed to protect me against COVID than when I take a COVID vaccine." pic.twitter.com/yPdsSSQAbr

— CSPAN (@cspan) September 16, 2020

The results of the Danish study undermine the assertion from public health officials that wearing a surgical mask can protect individuals from COVID-19 infection, but that's unlikely to end the mask debate, which has become one of the most vitriolic issues in America today.

It's worth pointing out, however, that masks were not a divisive issue until governments began mandating their use.

As I've said before, reasonable and persuasive cases can be made both for and against the use of masks in the healthy population. But by replacing individual choice with collective mandates, public officials have politicized the issue and polluted the science. For example, scientists have faced retraction demands on research that concluded mask-for-all policies were not based on sound data. Additionally, the Danish study appears to have been delayed because medical journals were wary of its findings.

Few of us—even medical professionals, it seems—are able to answer with any degree of certainty whether masks are an effective form of protection against the coronavirus.

Some see this as a reason to force everyone to wear a mask. Yet in reality, the uncertainty is all the more reason the decision should be left to individuals.

"All rational action is in the first place individual action," the economist Ludwig von Mises once observed. "Only the individual thinks. Only the individual reasons. Only the individual acts."

Public health officials should not be recommending a preventative measure—let alone mandating it—without knowing it is effective. (In public health, this is known as the principle of effectiveness.)

Governments forcing healthy people into mask-wearing was always an affront to the rights we hold over our own bodies and our basic human dignity.

It's also beginning to look more and more like an affront to science.

Thank you for time

Subject: Re: Mask mandate in Butler County

I'm asking you to not force a mandate and more government control in our town. I will ask that you guys come up with a way to better educate people so WE THE PEOPLE can make informed decisions for ourselves; Not political reasons, not trying to fit in reasons, true information. Give us true El Dorado covid numbers, not 'here's a total for the whole county since February', but 'here's the information about covid numbers today, this week' just in El Dorado ; 'here's how transmission mostly likely occurred in these new cases this week'. I realize there is information on the CDC website, but many do not trust such information. I'm talking about just El Dorado. Maybe have the information come from our hospital's spokesperson, 'Here's the El Dorado information on Covid-here's how they were exposed'.

Numbers are rising, not because of a lack of mask mandate, but because you can't keep people away from people! People are willing to take the risk of getting the virus, so let them take the risk. Those who don't want to take the risk already have plenty of avenues to not take the risk. Walmart and Dillons pick up and drop off, pharmacy drop offs, individuals who will choose to wear masks to be around the concerned or vulnerable crowd. People do not appreciate information from huge government run organizations that have no idea about our town's everyday lives and being told we don't enforce masks because we hate people. I love El Dorado. I love my elderly neighbors. I care about them so much I do what I can to help them and get to know them. Requiring masks, that are clearly marked that they do not prevent anything, doesn't show my care for my city and my neighbors. Please don't make a political decision. Please make a decision to give us CLEAR information that pertains to US, our precious fellow El Dorado Kansans, coming from one of us. I bet you'll find more people responding to your recommendations in a positive way, and those who choose not to, still have that choice. Lastly, if you still vote to make this mandate, please include a religious gathering exemption and choose not to fine our town's people.

I hope you've read this in positive way as I do not have any anger towards you or even this issue. I'm one who rarely says anything and just watches what happens. I pray the added pressure of dealing with the virus isn't having a negative impact on you or your family. Thank you for taking time to read this from:

Just an average El Dorado citizen

Mr. Young, Thanks for your mask comments at last night's commission meeting! We do have, and will continue for a few months, a crisis with this pandemic! It alarms me that our hospitals staff are stressed to the limit and we are 2 to 3 months away from all having a vaccine. What more can we do but to use the MOST POWERFUL tool we have, "a mask"! and wear it, just for another month or two!

A small sacrifice on our part may save a hospital bed, a doctor/nurse from being overworked, and even one more death!

Please strongly consider a face covering mandate for the next month or two!

Subject: NO Mask mandate for El Dorado

Dear Mr. Young,

My husband and I live in rural Butler County. Even though we are not residents of the city of El Dorado, we have done the bulk of our business and shopping in El Dorado for the 41 years we have been married.

We are in our 60s and have chosen, as a matter of freedom, not to wear masks anywhere. As a result, any business that requires us to wear them does not get our business. This has forced us to do more online shopping, since March. If you impose a mask mandate, we will not do any shopping or business in El Dorado. We have been thankful that Butler County has not imposed the mandate. My husband and I used to frequent Wichita often and now we rarely go there, because of their mask mandate.

As the people who are representing citizens of your town, please side on freedom. Small-town America is known for its common sense. We ask you to stand with that tradition.

Subject: Masks?

Dear Mayor and Commissioner's,

This Covid is so strange, you have to admit. This is what I feel you should know. My wife and myself own Turner's Coffee & Donuts. When the governor closed our dining room, our sales plummeted. The only financial help we received was a check from the chamber. We applied for everything the government offered, only not to hear anything back from them. We did not apply for the city help for that same reason, why give them our financial information just to hear nothing back?

You all have a tough descension to make!! I can tell you we have a 90 year old couple that drives from Cassody everyday we are open. They only wear a mask where it is mandatory. Yes, they are worried however it does not stop them from coming in when the state closed our dining room, they did come through our drive thru.

I too only wear a mask where it is mandatory.

Subject: Work session

I'm very disappointed that YOU are not more supportive of a mask mandate. Our numbers keeping rising. We need to be more proactive in this battle with the virus. You want your daughter and other kids back in school. But, it's alright for the kids to be active in their sports. What's MORE important, learning in a classroom with an in person or sports?

As a business owner I encourage customers to wear a mask in the Dairy Queen. International Dairy Queen requires ALL stores to follow our state mandate. I want to keep myself healthy and other people.

I have two family members in a lockdown facility because of this virus. I haven't seen my 94 year old dad since March 12th in person. But, it is acceptable NOT to have a mask mandate in our town. We all need to quit thinking of ME, and think of other people.

I encourage you to watch the work session from Wednesday night. I was shocked the way you to talked to Kendra. We all have interrupted our fellow commissioners in a discussion. I was taught to respect our elders. I would of NEVER talked to Oral Taylor the way you talked to Kendra!!

Linda Clark
316-323-3131

I have a sign at Dairy Queen, MASK REQUIRED. After your comment last night concerning not going to business that require a mask, if you don't agree with wearing a mask. I probably won't see you at Dairy Queen.

Dear City Commissioners,

I strongly urge you to adopt a city wide mask mandate. A mask mandate has been proven to save lives, reduce the spread of Covid 19, and reduce hospitalizations from Covid 19. Since the Butler County commissioners failed to approve a county wide mask mandate, your action would literally be life-saving.

Sincerely,

Sarah Johnston MD, MPH

Subject: Mask mandate choice

Dear Sir,

My wife and I are citizens of ElDorado and urge you to stand up for personal freedom. The mask mandate by Kansas' Governor is over-reaching and takes away the freedoms granted to us by the United States constitution. It is also not based on any of the science of virology that has been relied upon and proven for many years now. Our Butler county commissioners looked at research and facts about masking and are standing on the side of truth. There is relevant scientific literature going back 70 years that has repeatedly found that in the case of airborne viral respiratory disease spread, face masks have no discernible benefit. (See, e.g., "Nonpharmaceutical Measures for Pandemic Influenza in Nonhealthcare Settings - Personal Protective and Environmental Measures" in the CDC Policy Review, Vol 26, Nbr 5, May 2020). It is only since May of this year, in the midst of a heavily politicized situation, that the scientific pronouncements of some have changed.

Please do not edict a mask mandate for our city. Please stand with our county commissioners in opting out of the Governor's mandate.

Thank you for your time,

Alyssa and Cody Hull

Speaking from personal experience, contraction covid-19 from a family dinner on Mother's Day, PLEASE vote yes to the mask mandate!!! It's a sneaky virus, you CANNOT tell someone has it sometimes. Which is what happened in my case. My entire family of 4 was infected. This was after self quarantine for 2 months, my family hadn't been anywhere!! But we gave in on Mother's Day to see our family. Big mistake!! We all made it through but it was very rough. My mother in law was in ICU for over a month. I felt that I needed to go to the ER but was so scared. I had to call my dr on her personal cell several times. My son spread it to his girlfriend and her entire family of 5. He also spread it to 3 of his friends. All UNKNOWINGLY. Everyone of the 9 people at our family dinner ended up positive but 1. My husband spread it to 3 coworkers and their families. All these people, from one 23 yr old girl that continued to go to bars, restaurants ect with friends. AND WE COULD NOT TELL she or we had it until it was too late. Please, help stop the spread!!!--

Mrs. Rice

Subject: Mask Ordinance

To whom it may concern

As the Controller of seven (7) Local Businesses I am writing to you in regards to the mask ordinance you are considering.

In my opinion I am frustrated this is even coming up as an option for you to pass as an ordinance in the city for several reasons.

1.) Shouldn't it be up to the business if they want to require their employees and staff to wear a mask? I do not feel like it is the Governments place to say what can and can't be done by private businesses. When did our rights get taken away to be able to make the decision for what makes sense for our businesses.

-With this a customer is free to chose if they want to do business with a retailer based on the policy the business has in place.

2.) How do we have the resources to police this policy? Our law enforcement professionals are already busy with other crimes and adding this order you will greatly increase the number of calls to 911 with people calling to tell on other people or businesses for not wearing/requiring masks. Which will stretch our resources even thinner!

3.) You are looking at adding fines for not following this order. There are a lot of businesses who have had to cut hours (or lay off) of their employees due to business being slower. Adding this fine would just be a slap in the face to the citizens of El Dorado who could already be struggling to pay their bills because of the hard times!

Also for your consideration

When during any other pandemic has our government forced the healthy to protect themselves
(H1N1, H2N2, H3N2, 1918 Pandemic, 1930 Flu Pandemic)

I URGE you to vote to not adopt this Ordinance and think about how it could hurt the people of
El Dorado and the businesses of El Dorado.

Thank you for your time!

Subject: masks

My husband and I live near Whitewater and do all of our shopping in El Dorado. We also own 24 houses that we rent out in El Dorado. So even tho we have been shopping in El Dorado for over 40 years we now have to wear masks. Some medical people have said the masks are harmful. I know that the material makes my throat dry and thirsty. If the voting passes we can shop somewhere else.

This law can really harm the businesses in El Dorado. There are already many stores that have been hurt because of the shutdown that we had to wear masks.

If some people want to wear masks we don't' blame them but it is not up to the city to decide that we are going to be fined if we don''t wear them.

Subject: Mask Mandate

Dear Commissioner,

I read that you will soon be voting on a mask mandate for the city of El Dorado. I'm requesting that you vote NO on such a mandate. I take my family's health very seriously and am daily proactive in ensuring that we remain healthy.

However, I am strongly imposed to mandates. I don't believe the science backs up the necessity of masks, and I appreciate the freedom to research and pursue my own health choices.

We don't live in the city limits, but we do spend several thousands dollars every year in El Dorado. If we are required to wear a mask, this is a big enough issue to us that we will take our business elsewhere.

Please vote in favor of individual choice. Please vote NO to the mandate.

Thank you,
Rachel Busenitz

Subject: Mask mandate

El Dorado Commissioners and Mayor,

I implore each of you to vote against the proposed mask mandate for the city of El Dorado. I am strongly opposed to the mask mandate for several reasons:

First off, a mask mandate is outside of the lawful scope and purpose of civil government, and a violation of individual rights. Let me explain. Our county and form of government was founded on the idea that each of us is endowed by our Creator with certain inalienable rights, including the rights to life liberty and the pursuit of happiness (right to property). And that the purpose of government is to secure these rights for the people. This is achieved by enforcing justice. For example if someone steals some item of your personal property they are violating your rights to property and the fruits of your labor. Or if someone kills someone else, or strikes and injures another they have violated that person's right to life. For this reason we created and enforce laws against things like murder, theft and battery. This is the role of government. The role of government is NOT to keep everyone completely safe, and healthy at all times. I am not willing to surrender freedom for security! Doing so is a slippery slope into all manner of tyranny. Mask orders, and stay home orders are current examples of this. What comes next? Mandatory vaccination? Tracking people?

Second: mandatory masking is not good for El Dorado or the surrounding areas. Last time I checked we have fewer cases than some of the surrounding counties that have mask mandates. I also know people who wore masks and still got COVID, and people who didn't wear masks and didn't get COVID. I'm not at all convinced the masks even help. Further my family, and many others I know are choosing to do business in el dorado and Butler county in order to avoid being dictated masks!

Again please protect liberty and vote against a mask mandate for El Dorado.

Respectfully,
Ashley Nicholson

Subject: Mask Mandate

Mayor Young, and City Commissioners,

My family has greatly appreciated the ruling of the Butler County Commission to not require masks in Butler County. Wearing a mask while doing business in El Dorado is not going to make any of us healthier. The fact that El Dorado has not had a mask mandate has increased the business in our town, with people choosing to do business in El Dorado rather than Newton or Wichita where a mask is required. We all have common sense. The people of Butler County are common sense people. If we are sick, we stay home or wear a mask, but there is absolutely no reason for healthy people to wear masks. Let's not increase or extend the restrictions that our country has already endured. We need to live our lives, and realize our times are in God's hands. You will be hurting our people and our city if you pass this mandate.

Sincerely,
Darren and Karis Schwindt

Subject: Commission Mask Vote

For decades, the scientific studies have shown that surgical masks do not help prevent the spread of viral diseases.

Early this year, that is the advice we were given, "Surgical masks can not help prevent the spread of viral diseases." However, this was changed to, "Masks may help prevent you from spreading the virus if you are asymptomatic positive," and finally, "Masks may prevent you from being exposed to the virus." The previous information, based on controlled studies had remained the same for decades but now the recommendations change frequently, without controlled studies as a foundation.

Since most Kansas counties have seen a rise in cases since instituting mask mandates, I can not understand the conclusion that masks help prevent spreading the virus, unless there has been some controlled comparison (of similar circumstances in population density, age, etc.,) where the non-mask-wearing group has had a higher rate of increase in positive cases than the group that was wearing masks.

I know that this is an emotional topic, but this is not a decision that should be made based on emotion.

If you want me to wear a mask, please don't threaten me with a fine; please don't try to persuade me emotionally by explaining how bad this disease is, and how badly I should feel about it, and please don't bully me with "Wear your mask for others" messages. Instead, please show me scientific evidence of solid research where masks have helped slow the spread of this disease. When I see that, I will definitely wear a mask - for you, for others, for my family, and for myself. Until then, I believe that taking a stand against requirements that are based solely on feelings and theories is taking a stand for freedom. For mine, for others, for my family, and for myself.

Thank you for your time,
Denise Busenitz

Subject: Please Vote No

Good Afternoon,

I am asking as a resident of Butler County and a frequent shopper of local El Dorado that you please vote against mandating the masks for El Dorado. This will not help the local economy - we are so fortunate to live in an area of independent, free-thinking, do-your-research and make wise decisions for yourself and your family - I believe that many will choose to simply cease coming into town to shop, opting instead to do curbside pick-ups with box chain stores. Our small businesses may very well suffer for a choice that does not represent the residents that the City says to protect and represent. If the majority of people are not asking for protection from local government and in fact, asking for the God-given right to do their own research and make individual decisions for their families - then who exactly is the local government protecting in requiring masks? Certainly not the majority who are asking you specifically to *not* "protect" them. The Jewish families during the Holocaust were also sold the same line of "we can protect you" from the Nazi soldiers that moved them from home to ghetto to train to death. We do not need the government to determine what is best for our families. We could use perhaps some more fact-based research and less following to avoid political upheaval and dislike from the few who's voices are not even the loudest, but scream from the sidelines about "don't you believe in science?"

Yes, let's take a look at actual science. Here are a few science-based articles that use medical studies that prove the narrative being presented on a massive scale is not only incorrect, but actually harmful. For myself, I have a mast cell disorder that, by wearing a mask, could actually trigger a cascade of health issues that would be much worse for me than the possibility of contracting covid-19.

<https://gbdeclaration.org>

<https://www.brighteon.com/42ace589-01fc-4a2b-9654-20b0bf0bc315>

<https://www.meehanmd.com/blog/2020-10-10-an-evidence-based-scientific-analysis-of-why-masks-are-ineffective-unnecessary-and-harmful/>

<https://www.rcreader.com/commentary/masks-dont-work-covid-a-review-of-science-relevant-to-covide-19-social-policy>

Thank you for taking the time to truly listen to your residents as well as study the fact-based research and listening to the 5 minute youtube video of Dr. Roger Hodkinson.

In closing, to quote the second article above:

By making mask-wearing recommendations and policies for the general public, or by expressly condoning the practice, governments have both ignored the scientific evidence and done the opposite of following the precautionary principle. In an absence of knowledge, governments should not make policies that have a hypothetical potential to cause harm. The government has an onus barrier before it instigates a broad social-engineering intervention, or allows corporations to exploit fear-based sentiments.

Furthermore, individuals should know that there is no known benefit arising from wearing a mask in a viral respiratory illness epidemic, and that scientific studies have shown that any benefit must be residually small, compared to other and determinative factors.

Many thanks,

Laura Wyant

Further my family, and many others I know are choosing to do business in el dorado and Butler county in order to avoid being dictated masks!

Finally: mask mandates are a waste of law enforcement resources, and a waste of community trust. I say this as a patrol deputy for the Sheriffs Office. Fortunately I wouldn't have to enforce your city mandate, or I would be looking at turning in my badge as I am wholeheartedly

unwilling to write people tickets for not wearing masks! I signed up for this job to protect people's rights not infringe on them! Moreover your own El Dorado police department has plenty of more critical things to do already. None of us have time to harass law abiding citizens over masks. And if we did, a large portion of our community would hate us for it.

Again please protect liberty and vote against a mask mandate for El Dorado.

Respectfully,
Ezra Nicholson

Subject: Please hear our voice!

Mayor, I hear you and the rest of El Dorado commissioners are voting on the mask mandate on Monday officially. I ask you to please consider the freedom you are discussing removing from us. Besides the question of if they even work, they are very unhealthy for some of us. I'm pregnant with a high risk pregnancy to a sweet little boy, and they make me dizzy and unable to catch my breath. I'm far from alone with this response to wearing a mask. I should not be punished for trying to take care of my unborn child and myself, should I? I respect those who choose to wear them but ask that we are given the freedom to choose. I know many are coming to ElDorado to shop because of the lack of mask mandate we have enjoyed until now. I Completely avoid Wichita and many others do too. If this passes, these people will plan to go to other towns who have not passed this to do shopping etc. Please hear the voice of us who are trusting you to be our voice. I truly believe we are the majority on this issue. Thank you for taking time to read my email and consider it! I do understand you voted against the mandate originally and my family really appreciates this!

Dear Kendra,

Thank you for replying to our message. I'm forwarding an article about the virus; it makes no mention about masks, so that isn't my goal. It's information that seems is overlooked or unknown by many. There is so much misinformation, confusing information, conflicting information.....etc that we look to many sources to gather quality data. I don't believe the general public is getting the facts, so as to make an informed decision. We have chosen since March 27, 2020 to be unafraid and to live our lives without fear. Our faith in God has informed that decision, as well as the lack of quality, consistent FACTS.

There are many studies that are ignored by most public policy makers that show that masks, unless they are N95, do nothing to stop a virus such as COVID19. We believe that it IS a personal decision, and until people who set our communitys' "rules" can PROVE that a mask makes a difference, we still choose individual freedom.

I hope that you'll read this article, and if you are unaware of Hillsdale College, you'll be interested in learning about it, so you can decide if you think it is a reputable source to access. Hillsdale College and its *Imprimis* publication have taught us much about our great country and the remarkable US Constitution which was inspired by God.

Thanks for your time,
Tami Gray

The following is adapted from a panel presentation on October 9, 2020, in Omaha, Nebraska, at a Hillsdale College Free Market Forum.

My goal today is, first, to present the facts about how deadly COVID-19 actually is; second, to present the facts about who is at risk from COVID; third, to present some facts about how deadly the widespread lockdowns have been; and fourth, to recommend a shift in public policy.

1. The COVID-19 Fatality Rate

In discussing the deadliness of COVID, we need to distinguish COVID *cases* from COVID *infections*. A lot of fear and confusion has resulted from failing to understand the difference.

We have heard much this year about the “case fatality rate” of COVID. In early March, the case fatality rate in the U.S. was roughly three percent—nearly three out of every hundred people who were identified as “cases” of COVID in early March died from it. Compare that to today, when the fatality rate of COVID is known to be less than one half of one percent.

In other words, when the World Health Organization said back in early March that three percent of people who get COVID die from it, they were wrong by at least one order of magnitude. The COVID fatality rate is much closer to 0.2 or 0.3 percent. The reason for the highly inaccurate

early estimates is simple: in early March, we were not identifying most of the people who had been infected by COVID.

“Case fatality rate” is computed by dividing the number of deaths by the total number of confirmed cases. But to obtain an accurate COVID fatality rate, the number in the denominator should be the number of people who have been infected—the number of people who have actually had the disease—rather than the number of confirmed cases.

In March, only the small fraction of infected people who got sick and went to the hospital were identified as cases. But the majority of people who are infected by COVID have very mild symptoms or no symptoms at all. These people weren’t identified in the early days, which resulted in a highly misleading fatality rate. And that is what drove public policy. Even worse, it continues to sow fear and panic, because the perception of too many people about COVID is frozen in the misleading data from March.

So how do we get an accurate fatality rate? To use a technical term, we test for seroprevalence—in other words, we test to find out how many people have evidence in their bloodstream of having had COVID.

This is easy with some viruses. Anyone who has had chickenpox, for instance, still has that virus living in them—it stays in the body forever. COVID, on the other hand, like other coronaviruses, doesn’t stay in the body. Someone who is infected with COVID and then clears it will be immune from it, but it won’t still be living in them.

What we need to test for, then, are antibodies or other evidence that someone has had COVID. And even antibodies fade over time, so testing for them still results in an underestimate of total infections.

Seroprevalence is what I worked on in the early days of the epidemic. In April, I ran a series of studies, using antibody tests, to see how many

people in California's Santa Clara County, where I live, had been infected. At the time, there were about 1,000 COVID cases that had been identified in the county, but our antibody tests found that 50,000 people had been infected—i.e., there were 50 times more infections than identified cases. This was enormously important, because it meant that the fatality rate was not three percent, but closer to 0.2 percent; not three in 100, but two in 1,000.

When it came out, this Santa Clara study was controversial. But science is like that, and the way science tests controversial studies is to see if they can be replicated. And indeed, there are now 82 similar seroprevalence studies from around the world, and the median result of these 82 studies is a fatality rate of about 0.2 percent—exactly what we found in Santa Clara County.

In some places, of course, the fatality rate was higher: in New York City it was more like 0.5 percent. In other places it was lower: the rate in Idaho was 0.13 percent. What this variation shows is that the fatality rate is not simply a function of how deadly a virus is. It is also a function of who gets infected and of the quality of the health care system. In the early days of the virus, our health care systems managed COVID poorly. Part of this was due to ignorance: we pursued very aggressive treatments, for instance, such as the use of ventilators, that in retrospect might have been counterproductive. And part of it was due to negligence: in some places, we needlessly allowed a lot of people in nursing homes to get infected.

But the bottom line is that the COVID fatality rate is in the neighborhood of 0.2 percent.

2. Who Is at Risk?

The single most important fact about the COVID pandemic—in terms of deciding how to respond to it on both an individual and a governmental basis—is that it is not equally dangerous for everybody. This became clear very early on, but for some reason our public health messaging failed to get this fact out to the public.

It still seems to be a common perception that COVID is equally dangerous to everybody, but this couldn't be further from the truth. There is a thousand-fold difference between the mortality rate in older people, 70 and up, and the mortality rate in children. In some sense, this is a great blessing. If it was a disease that killed children preferentially, I for one would react very differently. But the fact is that for young children, this disease is less dangerous than the seasonal flu. This year, in the United States, more children have died from the seasonal flu than from COVID by a factor of two or three.

Whereas COVID is not deadly for children, for older people it is *much* more deadly than the seasonal flu. If you look at studies worldwide, the COVID fatality rate for people 70 and up is about four percent—four in 100 among those 70 and older, as opposed to two in 1,000 in the overall population.

Again, this huge difference between the danger of COVID to the young and the danger of COVID to the old is the most important fact about the virus. Yet it has not been sufficiently emphasized in public health messaging or taken into account by most policymakers.

3. Deadliness of the Lockdowns

The widespread lockdowns that have been adopted in response to COVID are unprecedented—lockdowns have never before been tried as a method of disease control. Nor were these lockdowns part of the original plan. The initial rationale for lockdowns was that slowing the

spread of the disease would prevent hospitals from being overwhelmed. It became clear before long that this was not a worry: in the U.S. and in most of the world, hospitals were never at risk of being overwhelmed. Yet the lockdowns were kept in place, and this is turning out to have deadly effects.

Those who dare to talk about the tremendous economic harms that have followed from the lockdowns are accused of heartlessness. Economic considerations are nothing compared to saving lives, they are told. So I'm not going to talk about the economic effects—I'm going to talk about the deadly effects on health, beginning with the fact that the U.N. has estimated that 130 million additional people will starve this year as a result of the economic damage resulting from the lockdowns.

In the last 20 years we've lifted one billion people worldwide out of poverty. This year we are reversing that progress to the extent—it bears repeating—that an estimated 130 million more people will starve.

Another result of the lockdowns is that people stopped bringing their children in for immunizations against diseases like diphtheria, pertussis (whooping cough), and polio, because they had been led to fear COVID more than they feared these more deadly diseases. This wasn't only true in the U.S. Eighty million children worldwide are now at risk of these diseases. We had made substantial progress in slowing them down, but now they are going to come back.

Large numbers of Americans, even though they had cancer and needed chemotherapy, didn't come in for treatment because they were more afraid of COVID than cancer. Others have skipped recommended cancer screenings. We're going to see a rise in cancer and cancer death rates as a consequence. Indeed, this is already starting to show up in the data. We're also going to see a higher number of deaths from diabetes due to people missing their diabetic monitoring.

Mental health problems are in a way the most shocking thing. In June of this year, a CDC survey found that one in four young adults between 18 and 24 had seriously considered suicide. Human beings are not, after all, designed to live alone. We're meant to be in company with one another. It is unsurprising that the lockdowns have had the psychological effects that they've had, especially among young adults and children, who have been denied much-needed socialization.

In effect, what we've been doing is requiring young people to bear the burden of controlling a disease from which they face little to no risk. This is entirely backward from the right approach.

4. Where to Go from Here

Last week I met with two other epidemiologists—Dr. Sunetra Gupta of Oxford University and Dr. Martin Kulldorff of Harvard University—in Great Barrington, Massachusetts. The three of us come from very different disciplinary backgrounds and from very different parts of the political spectrum. Yet we had arrived at the same view—the view that the widespread lockdown policy has been a devastating public health mistake. In response, we wrote and issued the Great Barrington Declaration, which can be viewed—along with explanatory videos, answers to frequently asked questions, a list of co-signers, etc.—online at www.gbdeclaration.org.

The Declaration reads:

As infectious disease epidemiologists and public health scientists we have grave concerns about the damaging physical and mental health impacts of the prevailing COVID-19 policies, and recommend an approach we call Focused Protection.

Coming from both the left and right, and around the world, we have devoted our careers to protecting people. Current lockdown policies are producing devastating effects on short and long-term public health. The results (to name a few) include lower childhood vaccination rates, worsening cardiovascular disease outcomes, fewer cancer screenings, and deteriorating mental health—leading to greater excess mortality in years to come, with the working class and younger members of society carrying the heaviest burden. Keeping students out of school is a grave injustice.

Keeping these measures in place until a vaccine is available will cause irreparable damage, with the underprivileged disproportionately harmed.

Fortunately, our understanding of the virus is growing. We know that vulnerability to death from COVID-19 is more than a thousand-fold higher in the old and infirm than the young. Indeed, for children, COVID-19 is less dangerous than many other harms, including influenza.

As immunity builds in the population, the risk of infection to all—including the vulnerable—falls. We know that all populations will eventually reach herd immunity—i.e., the point at which the rate of new infections is stable—and that this can be assisted by (but is not dependent upon) a vaccine. Our goal should therefore be to minimize mortality and social harm until we reach herd immunity.

The most compassionate approach that balances the risks and benefits of reaching herd immunity, is to allow those who are at minimal risk of death to live their lives normally to build up immunity to the virus through natural infection, while better protecting those who are at highest risk. We call this Focused Protection.

Adopting measures to protect the vulnerable should be the central aim of public health responses to COVID-19. By way of example, nursing

homes should use staff with acquired immunity and perform frequent PCR testing of other staff and all visitors. Staff rotation should be minimized. Retired people living at home should have groceries and other essentials delivered to their home. When possible, they should meet family members outside rather than inside. A comprehensive and detailed list of measures, including approaches to multi-generational households, can be implemented, and is well within the scope and capability of public health professionals.

Those who are not vulnerable should immediately be allowed to resume life as normal. Simple hygiene measures, such as hand washing and staying home when sick should be practiced by everyone to reduce the herd immunity threshold. Schools and universities should be open for in-person teaching. Extracurricular activities, such as sports, should be resumed. Young low-risk adults should work normally, rather than from home. Restaurants and other businesses should open. Arts, music, sports, and other cultural activities should resume. People who are more at risk may participate if they wish, while society as a whole enjoys the protection conferred upon the vulnerable by those who have built up herd immunity.

I should say something in conclusion about the idea of herd immunity, which some people mischaracterize as a strategy of letting people die. First, herd immunity is not a strategy—it is a biological fact that applies to most infectious diseases. Even when we come up with a vaccine, we will be relying on herd immunity as an end-point for this epidemic. The vaccine will help, but herd immunity is what will bring it to an end. And second, our strategy is not to let people die, but to protect the vulnerable. We know the people who are vulnerable, and we know the people who are not vulnerable. To continue to act as if we do not know these things makes no sense.

My final point is about science. When scientists have spoken up against the lockdown policy, there has been enormous pushback: “You’re endangering lives.” Science cannot operate in an environment like that. I don’t know all the answers to COVID; no one does. Science ought to be able to clarify the answers. But science can’t do its job in an environment where anyone who challenges the status quo gets shut down or cancelled.

To date, the Great Barrington Declaration has been signed by over 43,000 medical and public health scientists and medical practitioners. The Declaration thus does not represent a fringe view within the scientific community. This is a central part of the scientific debate, and it belongs in the debate. Members of the general public can also sign the Declaration.

Together, I think we can get on the other side of this pandemic. But we have to fight back. We’re at a place where our civilization is at risk, where the bonds that unite us are at risk of being torn. We shouldn’t be afraid. We should respond to the COVID virus rationally: protect the vulnerable, treat the people who get infected compassionately, develop a vaccine. And while doing these things we should bring back the civilization that we had so that the cure does not end up being worse than the disease.

Subject: Potential city mask ordinance

Hi Tabitha:

I don't have a comment for the meeting on Monday other than to say I am in favor of a mask ordinance for the city of El Dorado.

Thank you for keeping track and letting our city council know how I feel about it.

Subject: Citizen comments for commissioners

Dear Commissioners,

Thank you for your time. I do not see the logic of a mask mandate given the rise in cases despite lockdowns and mask wearing. I have no illusions about the severity of this virus, but we must ask, are the much championed measures working? Are we becoming dependent on measures that do not work?

The best defense against the effects of COVID are a healthy diet and consistent exercise. Why not mandate what to eat and how to go about one's day (running/lifting vs tv, video games, and junk food)? The answer of course is, no matter the intentions, mandates on how to lead one's life are inconsistent with the spirit of this Country or our Constitution. Everyone has the ability to choose how to drive, what to eat, how to interact, and how to engage in commerce despite the effects those actions may have upon the community.

We must trust the individual to weigh and balance the threat of the virus vs the harm they may cause this community.

Lastly, a mask mandate would set up a structure where by those who have had the virus and fully recovered, and should therefore not wear masks, would be forced to reveal private health information as a reason why they are not wearing a mask (HIPPA?).

Please judge mandates and other government actions on their outcomes instead of their intentions. (Paraphrasing Milton Friedman)

Thanks,

Adam Ewy

Subject: Mask mandate

Matthew Guthrie City of El Dorado, KS Commissioner I am emailing because I don't think the mandate is fair. I cannot wear a mask because I have a cronic lung disease. It makes it hard for me to breathe. I don't wear one out of just being stubborn, it's because medically I cannot. Even at work I have to take it down to breathe. I think you really need to take into consideration ppl who have medical issues. I'm a nurse and have been one for 29 yrs and I know the risks.and for someone like me who has a compromised immune system with a cronic lung disease I'm not able to wear one. I've worked this whole time and have not caught anything. Ty for your time.

Subject: Do Lockdowns and Mask Mandates Work? | Steve Deace Show

Dear Sir,

I wrote you yesterday in regards to the mask mandate that our city is considering. I am asking you to watch this 10 minute clip in the link below. Steve Deace has been studying the data of covid since it all began in March. Truth is out there if one willing to find it. But it is not found in the local news or mainstream media.

Masks do not work to stop the spread of respiratory viruses. There are facts from decades and decades of study that prove it.

Subject: Covid 19 Mask Mandate

Gregg,

I would like to publicly voice my opinion AGAINST any type of mask mandate from the City of El Dorado.

As a citizen of El Dorado for the last 32 years and a multiple business owner/ employer in El Dorado, I do not support the idea of forcefully requiring citizens to wear a mask or under penalty of a fine. This should be a personal choice for a business or individual to make on their own. I will not argue the effectiveness of mask wearing, it is NOT my point.

If a person feels safer wearing a mask, then wear one. There is nothing prohibiting people from wearing a mask or standing a decent distance away from others or just avoiding a crowd or the public at large.

I have also spoken with several other business owners and a multitude of fellow citizens that are NOT in favor of a mask requirement. The largest problem is that the pro-mask people are way more vocal than then the rest of us... who, in my associations, outnumber them by 10 to 1.

Please vote to maintain my personal freedom to assume the risk for myself and my businesses. Us small businesses have suffered enough during this situation.

Regards,

Scott Hackler

Subject: Mask mandate

Hi Tabitha,

I want to thank all of you at the city and especially the commissioners for taking the opportunity to put a city wide mask mandate in place. As a small business owner I have been closed since March because I honestly do not trust the public to wear a mask in my building and to stay home if you're ill. I also work alone and the thought of having to argue with someone about wearing a mask sounds terrifying. I know people are getting extremely riled up at the thought of having to wear a mask and I honestly will never understand. So much information shows the community benefits from everyone wearing one.

As the saying goes, you're only as strong as the weakest link. As long as there's people out there going around without masks in public places, we are all at risk. Local, large employers have cases so high that entire departments are shut down for illness. If this continues nothing in our city will be open and we will continue to lose citizens to this illness. I would love to see a mandate enforced and you have my support.

Subject: Masks and info on Hypoxemia

Hello, I've heard the city has intentions to require mandatory masks in El Dorado city limits.

PLEASE postpone this vote until you and the commissioners can gather information such as I am sending below.

Drs and scientists, who have no agenda, connected to the current totalitarian takeover attempt, agree masks ARE HARMFUL, especially long term like with students are currently "required" to do, and cause false "security" to those wearing them who think they are protected.

There are a lot more reports to look at besides these, but I hope you will read them and then continue to think. I saw the minutes from last months meeting where some of these thoughts were looked at. *It's still a political issue, and politicians are placing themselves as medical professions attempting to enforce potentially proven harmful mandates.*

This is already becoming a issue with court filings in some places.

Are the El Dorado City officers, such as commissioners, ready to be "put on notice" ; ready to accept the liability and responsibility of the harmful long term effects of mandatory masks, which are stated by the scientists who know the truth??

That's why I am asking that the mandate be postponed so the issue can be further thought through, and only be considered after everyone is educated to make an informed decision!

Heathy Regards,
Cindy Yordy

Subject: Please Vote No

Dear Mr. Lewis,

I am a very concerned American Citizen. I feel like the Government is overstepping their bounds by enforcing a mask mandate. I feel like we as adults should have the right to decide for ourselves how to handle our healthcare. I have lived in El Dorado my entire life and if our fine city were to do something like make it mandatory to wear masks, I would be seriously disappointed. I love this town, and there have been some things that I don't agree with, but I have just let them go, but this time my conscience will not allow me to do that. When I heard about this possible mandate I was absolutely horrified. It would have to be absolutely ideal circumstances for them to work and that is not happening. Also, if you look at Sedgwick county, they have had a mask mandate for months and they are still seeing spikes! Where is the logic in that? Masks are not scientifically proven to stop Covid-19 and even our Surgeon General is not backing masks. Please, vote against wearing masks!!

Thank you for your time,
Sara Grove

TO: City Commission
FROM: David Dillner, City Manager
SUBJ: Equipment Reserve Transfers
DATE: December 4, 2020

Background: The City's General Financial and Budgetary Policies, most recently amended by Resolution No. 2908, states that *"any funds in excess of the minimum balance may be allocated to one-time expenses at the discretion of the governing body."* Several operating funds have a surplus arising, in part, from spending controls implemented in response to the COVID-19 pandemic. The City Manager recommends designating part of the surplus from these funds for the replacement of vehicles and equipment critical to the City's operations.

Earlier this year, staff provided an opportunity for the City Commission to review aging vehicles and equipment that were in dire need of replacement, but where insufficient funds were available for such replacement.

The purchase of funds for vehicles and equipment is a prudent use of reserve funds in excess of local requirements because such funds should be used for one-time purchase that do not increase operational expenses. By replacing aging fleet, the City may actually decrease operational expenses as a result of lower maintenance expenses attributed to newer vehicles or equipment.

Fiscal Impact: The proposed year-end transfers to Equipment Reserve Funds include \$856,000 from the General Fund, \$300,000 from the Water Fund, and \$200,000 from the Sewer Fund. The General Fund currently exceeds the maximum fund balance of \$2.26 million by \$2.85 million. These operating funds will continue to comply with local reserve fund policies following the proposed transfers.

Trade-offs: The City's current Equipment Replacement Plan does not adequately provide for the replacement of critical equipment needed for the provision of public services. By transferring the aforementioned funds, the City will expedite certain equipment purchases to accelerate the implementation of the plan. Failure to make timely replacements of the City's critical rolling stock and equipment may impair the City's ability to provide public services in a safe and efficient manner.

Staff Recommendation: The City Manager recommends transferring the aforementioned amounts from operating funds at year-end to allow for equipment replacement. The City Manager, in collaboration with staff, plans to develop a plan in the first quarter of 2021 to use the transferred funds to acquire and replace equipment needed for the provision of public services.

Commission Actions:

Commissioner _____ moved to authorize the transfer of funds to Equipment Reserve Funds as presented by the City Manager.

Commissioner _____ seconded the motion.

[Return to Agenda](#)
